It is possible to change your password via the User Menu

Via "Supplier Base Date" you can update company address details and DUNS Number

The screenshot displays the Mettler Toledo Supplier Portal interface. At the top, a navigation bar includes the Mettler Toledo logo, a home icon, and a user profile icon. Below this, a header bar shows the text "Supplier Portal Dashboard - Welcome, [redacted] from [redacted] 200062442".

The main content area is titled "Base Data" and contains a "Save" button. Under the "COMPANY DATA" section, there are several input fields for company information:

- Company name*
- Street*
- Street-number
- Zip code*
- City*
- Country*

On the right side of the page, there is a sidebar with four menu items, each with a gear icon for configuration:

- SUPPLIER BASE DATE
- SUPPLIER CATEGORIES
- SUPPLIER CONTACT AND ROLES
- SUPPLIER PROFILE

A red arrow points from the "SUPPLIER BASE DATE" menu item to the "Save" button, indicating the flow of the process.

Via "Supplier Categories" you can update your provided material groups or services.

SUPPLIER PROFILE

Click on triangle to open the drop-down list and choose the provided categories

You have the option to add new contacts to the portal through "Supplier Contact and Roles".

We suggest assigning at least two users with portal access. Any active user can create a new contact and grant portal access for your company.

The image shows a software interface for adding a new contact. On the left, the 'Add New Contact' form includes fields for 'Salutation*' (set to 'Mx.'), 'First name*', and 'Last name*'. Below this is a table of existing contacts with columns for Name, Login name, E-Mail, Telephone, and Portal Access. A red box highlights the 'Add new contact' button in the top right of the table area. On the right side, the 'Supplier Contact and Roles' settings page is visible, with a red arrow pointing to the 'SUPPLIER CONTACT AND ROLES' option. Below the table, a form for 'Portal Access' is shown, with a red box around the 'Loginname*' field and a callout box providing instructions.

Callout Box 1: If user should get notifications and have access to the portal, tick Access button & MT permission. Assign also a Loginname

Callout Box 2: We advise using "first name.last name" as your login username, but you have the option to select any preferred username

Via Roles you can assign the users to their respective area of responsibility

Assign to process areas
