

EasyClean 400

For highest demands – the fully automated cleaning and calibration system for pH measuring loops.

Technical Data

EasyClean 400

Short description

EasyClean 400 in combination with the transmitter M 700 and an InTrac retractable housing provides the optimal solution for automated cleaning and calibration of pH-electrodes. The multiple control possibilities and the extremely flexible programming of every single program allow an optimal adaptation of the EasyClean 400 to various processes. A special version is available for applications in explosive environments.

Features

- Flexible program sequences by freely programmable step sequences
- Minimum consumption of buffer and cleaning solution
- Optionally applicable for continuous processes or batch measurement
- Various program intervals or weekly program possible
- Various system integrations possible
- EasyClean 400 X: for explosion hazardous environments
- EasyClean 400 S: stainless steel, hygienic design
- EasyClean 400 C: coated, stainless steel housing

METTLER TOLEDO

EasyClean 400**EasyClean 400 automation system**

The complete automation system always consists of the following components:

- EasyClean 400
- Transmitter M 700 with the appropriate module EC 700
- Housing with pneumatic indicators
- pH sensor with cable

The module EC 700 includes the pH measuring module and controls the EC 400. For detailed information about the transmitter M 700, the appropriate InTrac retractable housing, and the respective pH sensor, please refer to the appropriate data sheet. When using a non-glass ISFET pH sensor, an additional pH 2700 module is required.

The EasyClean 400 includes the following components:

- Basic unit with controller, connections and valves
- Media connection, 5 m
- Media adapter, 3.5 liter reservoirs (3), assembled with 3 pumps (2 for buffer solution, 1 for cleaning solution)
- Connection kit for housing
- All connection cables

**pH/ORP input
(EEx ia IIC)**

	Simultaneous measurement of pH and ORP	
	Input glass electrode, Input reference electrode	
	Input redox electrode (ORP) or aux. electrode	
Measurement range (MR)	pH value	-2.00 ... +16.00
	ORP value	-2000 ... +2000 mV
	rH value	0.0 ... 42.5
Permissible voltage	ORP + pH [mV]	2000 mV
Permissible cable capacitance	< 2 nF	
Glass electrode input ¹⁾	Input resistance	> 1 x 10 ¹² Ω
	Input current ³⁾	< 1 x 10 ⁻¹² A
	Impedance range	0.5 ... 1000 MΩ
Reference electrode input ¹⁾	Input resistance	> 1 x 10 ¹⁰ Ω
	Input current ³⁾	< 1 x 10 ⁻¹⁰ A
	Impedance range	0.5 ... 200 kΩ
Measurement error ²⁾ (display)	pH value	< 0.02 TC: 0.001 pH/K
	ORP value	< 1 mV TC: 0.05 mV/K

**Temperature input*
(EEx ia IIC)**

Pt100/Pt1000/NTC 8.55 kΩ/NTC 30 kΩ, 2-wire connection, adjustable	
Measurement range	-50 ... +150 °C / -58 ... +302 °F (Pt100/Pt1000)
	-20 ... +150 °C / -4 ... +302 °F (NTC 30 kΩ)
	-10 ... +130 °C / +14 ... +266 °F (NTC 8.55 kΩ, Mitsubishi)
Resolution	0.1 °C / 1 °F
Measurement error ²⁾	0.2 % meas. val. + 0.5 K (< 1 K at NTC > 100 °C)

**Temperature compensation
(media dependent)**

Reference temperature 25 °C
– Linear temperature coefficient, user-defined -19.99 ... +19.99 %/K
– Ultrapure water 0 ... 150 °C
– Table 0 ... 95 °C, user-defined in 5 K steps

**Power output
(EEx ia IIC)**

For the operation of EasyClean 400		
$U_0 = +7.2 \text{ V}$	$I_0 = 200 \text{ mA}$	$R_j = 20 \Omega$
Operating data: 6.8 V ($\pm 10\%$)/15 mA		

ORP*

Automatic conversion to standard hydrogen electrode SHE when type of reference electrode is entered	
ORP calibration*)	Zero adjustment -200 ... +200 mV

Sensocheck

Automatic monitoring of glass and reference electrode, can be switched off
--

Sensor monitor

Direct display of measured values from sensor for validation pH input/
ORP input/glass electrode impedance/reference electrode impedance/temperature

ServiceScope

Noise level monitoring of the pH input signal, representation on display
--

Sensoface

Provides information on the sensor condition: Zero point/slope, response time, calibration interval, Sensocheck, CalCheck, can be switched off
--

*) user-defined

1) according to IEC 746 Part 1, at nominal operating conditions

2) ± 1 count, plus sensor error

3) at 20 °C, doubles every 10 K

Adaptive calibration timer*)	Automatic adjustment of the calibration interval (Sensoface information) dependent on the process variables		
Sensor network diagram	Graphic representation of the current sensor parameters in a network diagram on the display: slope, zero point, reference impedance, glass impedance, response time, calibration timer, deviation from calibration range (CalCheck)		
CalCheck	Checks the distance between calibration buffers and measured values. German patent DE 195 36 315 C2		
Tolerance band recorder	Records zero point and slope of the electrode and the selected tolerance bands, graphical presentation on the display		
Sensor standardization *)	Operating modes	<ul style="list-style-type: none"> – 1-/2-/3-point calibration (best fit line) – Calimatic automatic buffer recognition – Input of individual buffer values – Product calibration – Data entry of pre-measured electrodes

		<p>–1000 ... +1000 mV</p>	
Calibration protocol/statistics	Recording of: Zero point, slope, V_{IS} , response time, calibration process with date statistics and time of the last three calibrations and the first calibration		
RS 485 (EEx ia IIC)	$U_0/U_i = +5$ V	$I_0/I_i = 250$ mA	$R_i = 20 \Omega$
Transfer rate	1200 Bd for EasyClean 400 (X) 8 data bits/1 stop bit/no parity		
Protokoll	HART Rev. 5		
EasyClean 400 (X) controller	Manual, interval and time-controlled activation of calibration and rinsing programs		
Programs	7 programs can be called up		
	<ul style="list-style-type: none"> – 4 programs with fixed sequences, modifiable – 2 freely configurable programs, 1 service program 		
Diagnostics	EasyClean 400 (X) network diagram, graphical representation of EasyClean status		
Maintenance	Control of the individual valves and pumps with status indicators		
Explosion protection (Module EC 700 X only)	see rating plate: KEMA 04 ATEX 2056 II 2 (1) GD EEx ib [ia] IIC T4		

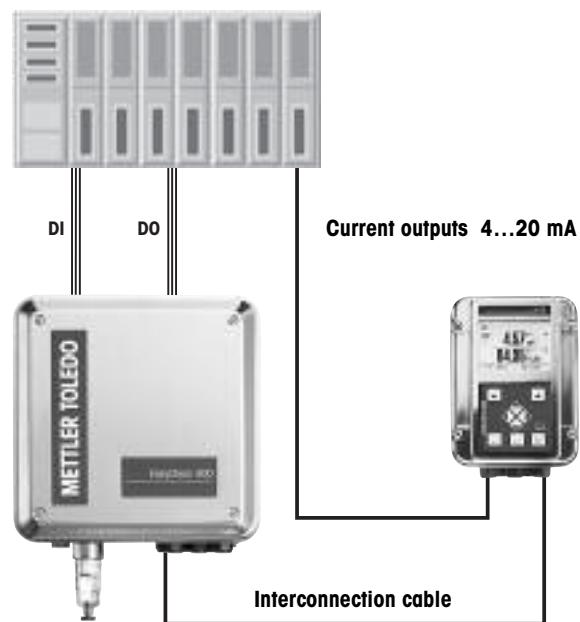

*) user-defined

Integration with distributed control system

The EasyClean 400 and M700 system can be controlled by a distributed control system. Integration with the process control system can be performed either conventionally (digital inputs and outputs) or via a Profibus PA network.

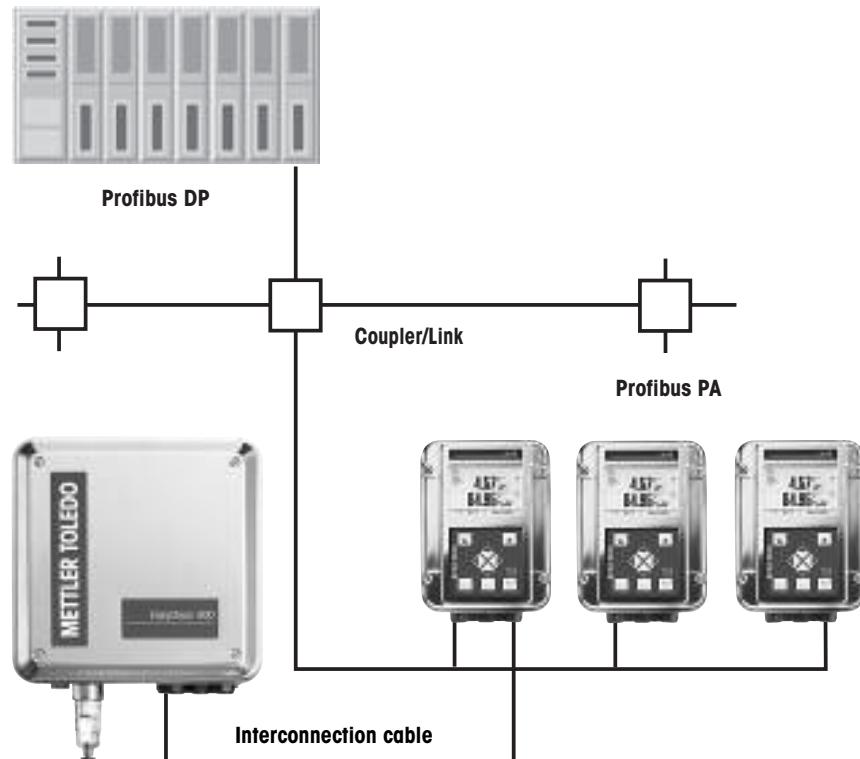

Version 1: Conventional (digital inputs and outputs and current outputs)

The EasyClean 400 is controlled by the digital inputs and outputs of the distributed control system and the measured values are transmitted via the current outputs of the M 700. In addition, four alarm outputs of the transmitter M 700 can be integrated in the process control system. For a description of the inputs and outputs, please refer to specifications.

Distributed control system (DCS)

Version 2: Profibus PA

The EasyClean 400 is integrated into a distributed control system via a Profibus PA network. This version greatly reduces the wiring requirements, offers an enhanced diagnosis of the measuring point and allows configuration of the system from the control stand. This version requires an additional Profibus PA communication module in the transmitter M 700.

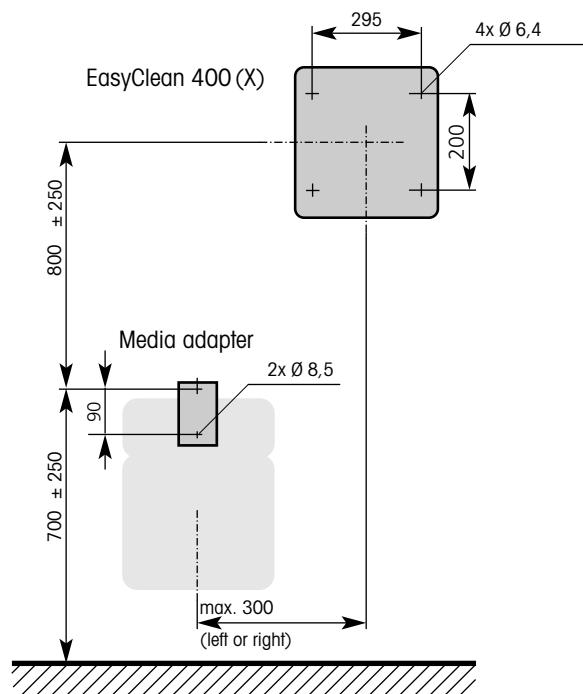

Distributed control system (DCS)

Mounting arrangement EasyClean 400 (x) and media adapter

Arrangement of components: acceptable distances and pump heights.

Arrangement of components

The installed location must have sufficient stability and must be free of vibration, as much as possible. The specified ambient temperature must be observed and may not fall below +5 °C (41 °F). For outdoor installation, special measures may need to be taken since direct solar radiation may raise the temperature above specified limits.

Unit of measurement: (mm)

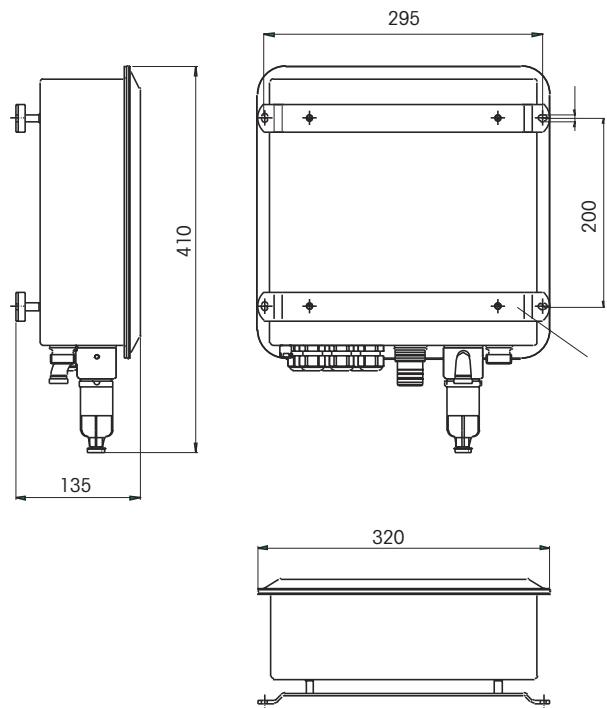

Distances and pump height

Cable lengths:

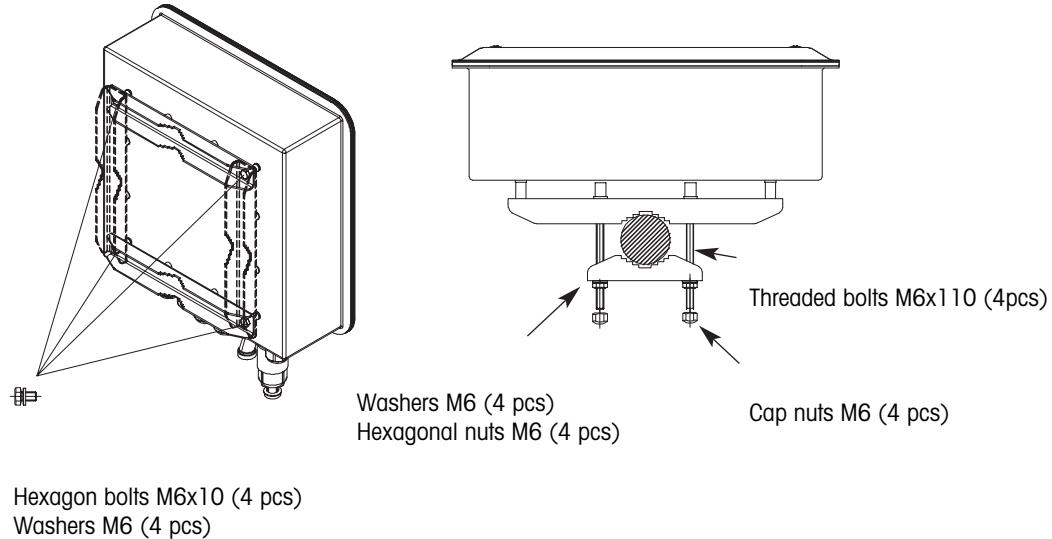

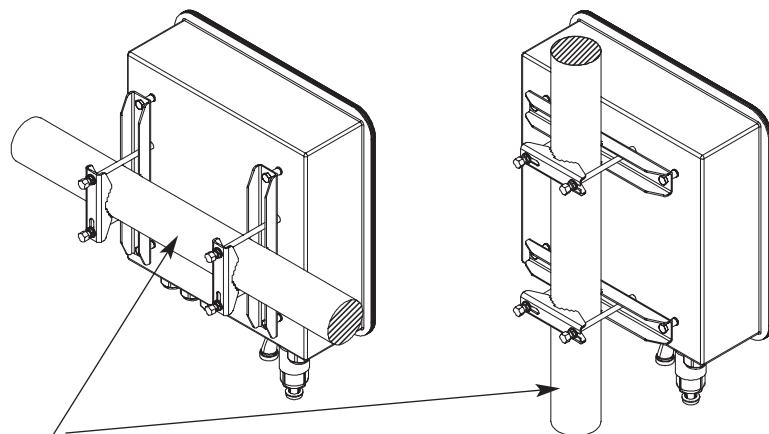

EC 400 (x) - M 700 (x): 10 m

EC 400 (X) - Retractable housing: 5 m or 10 m (optional)

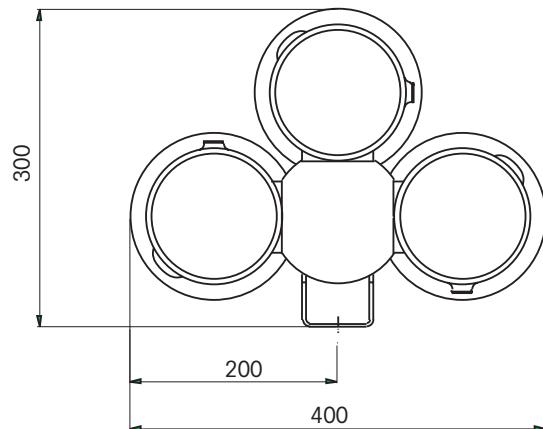

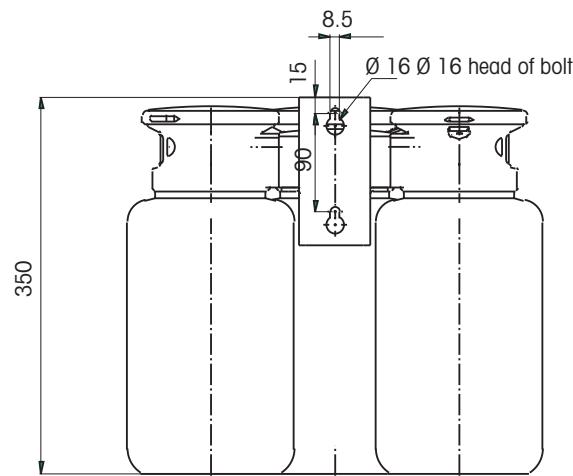

Max. Pump height of pumps: 10 m

Wall mounting

Unit of measurement: (mm)

EasyClean 400 (X) post mounting**Vertical or horizontal post mounting**

Diameter of post: 30...65 mm

Media adapter

Unit of measurement: (mm)
