

Comprehensive User Training

UV/VIS Excellence Spectrophotometers

Simple and sufficient

UV/VIS spectroscopy made easy – professional training with guidance through practical workshops. Less theory – more hands-on! This practical guidance can also be used during the daily work. The training certificate supports quality requirements and audit expectations.

Confidence and success during daily routines

Professional training at an appropriate user level makes UV/VIS spectroscopy and instrument operation easy to understand. Good training gives operators confidence in their daily work – in the lab or in production.

Efficient and convenient

Direct deployment and increased efficiency right from the start are possible. On-site training enables the operators to make measurements immediately and no time is lost in time-consuming external training. Furthermore, any new staff can be trained using the same easy-to-understand training concept.

Tailor-made solutions

For every need, METTLER TOLEDO provides the right service solutions for life-long measurement performance, productivity and quality management.

EduPac UV/VIS
Professional Education Package
UV/VIS Excellence
Version 1.0

EduPac: your expert in UV/VIS spectroscopy

Thanks to intuitive operation, UV/VIS Excellence spectrophotometers are easy to use. However, particularly with a newly acquired instrument, professional training ensures immediate and successful deployment with no downtime needed to figure out how things work. Appropriate qualification of personnel is a requirement of numerous standards and regulations. In order to support you in meeting these requirements METTLER TOLEDO has created the EduPacs. The UV/VIS EduPac is a service solution specifically designed to address operator training needs. It provides detailed training documentation as well as a professional presentation and demonstration with practical exercises.

EduPac:

Professional Operation of UV/VIS Excellence Spectrophotometers

UV/VIS Spectroscopy EduPac	Your needs	EduPac benefits
Informative and engaging presentation given by a METTLER TOLEDO expert, including easy-to-understand theory ,demonstration and practical hands-on exercises.	Qualified personnel	User training
	Good knowledge base	UV/VIS spectroscopy expertise
	Practical skills	Hands-on exercises
	Evidence of training	Certificate of Participation
	Immediate instrument deployment	Immediate start after installation and training
	Flexibility	User-specific instrument configuration made easy

Overview of UV/VIS Spectroscopy EduPac

EduPac for METTLER TOLEDO UV/VIS Excellence spectrophotometers:

- UV7/UV5/UV5Bio/UV5Nano

This EduPac offers:

- Basics of UV/VIS spectroscopy
- Instrument familiarization including hardware, methods, results interpretation, performance verification and applications
- Demonstration and practical exercises
- Operational tips for reliable results
- Introduction to the relevant accessories
- Recommendations for system maintenance

Order information for EduPac training:

GVUP & EduPac

METTLER TOLEDO's Good UV/VIS Practice™ program, GUVP, was designed to support customers in achieving accurate and reliable UV/VIS spectroscopy results. To support Step 4 of the GUVP lifecycle program, the UV/VIS EduPac provides professional operator training and serves perfectly as a future reference.

Trained operators:

- gain confidence and are able to achieve accurate and reliable results
- increase expertise in the lab
- receive easy-to-understand training material that can be used later for reference
- are provided with a Certificate of Participation showing the skills learned and fulfilling compliance requirements for training .

Moreover, the EduPac training material can be reused, when new laboratory staff are hired and need training in UV/VIS spectroscopy.
