

## **Profitable Pallet Logistics** Solutions for Freight and LTL

**METTLER** **TOLEDO**

# Efficient Freight Handling

## Quick, Accurate and Paper-Free

**Processing freight can be time consuming and involve many steps. Robust floor and forklift scales integrated with automatic pallet dimensioners speed up and simplify the process. Capture weight, dimensions and ID in seconds for invoicing, pricing and planning.**

# TLD870 – Static Pallet Dimensioning

## Simple, Fast, Accurate

Freight companies need to measure pallets quickly for revenue recovery, costing, invoicing and load planning. The TLD870 speeds up the measuring process and keeps operations running smoothly.

► [www.mt.com/TLD870](http://www.mt.com/TLD870)

OCTO ImageCapture™ takes a picture of each shipment for proof of condition, content and measurement using a legal-for-trade system.

### Fastest Measurement

Quick measuring time allows you to measure more pallets more efficiently. Recover revenue on up to 240 pallets an hour without impeding operations or missing cut-off times.

### Easily Measure Any Pallet

Some pallet wrappings cause problems for dimensioners. The TLD870 gives an accurate reading on 99 percent of surface types for easy, efficient revenue recovery.

### High Uptime, Low-Cost Service

For revenue recovery you can rely on, choose a pallet dimensioner that is designed for tough, industrial environments with no need for regular replacement of wear parts.

## Fast, Efficient and Hassle Free

### TLD870 Pallet Dimensioner

The TLD870 captures dimensions of any pallet in a matter of seconds. Combine it with floor or forklift scales to form a complete pallet dimensioning, weighing and scanning solution.

# TLD970 – Dynamic Pallet Dimensioning

## Non-Stop, In-Motion Measuring

To keep efficiency at its peak, you need a pallet dimensioner that doesn't put restrictions on your operation. The TLD970 measures trucks traveling at speed, requiring no slow-down or careful positioning of the truck. This solution integrates so seamlessly into operations you won't even know it's there.

► [www.mt.com/TLD970](http://www.mt.com/TLD970)

The smart, patented design of the TLD970 takes full advantage of METTLER TOLEDO's best-in-class dimensioning technology to record all data needed for in-motion pallet measurement.

### Improve Efficiency By up to 70%

Measure up to 720 pallets an hour in a fully automatic, non-stop process.

### No Slow Down, No Measuring Restrictions

Simply drive through and measure without thinking about forklift speed or position.

### One Efficient Process

Combine dimensions, weight, pallet ID and image for a complete data profile on every piece of freight you handle.

## Automatically Measure Any Pallet

### No Restrictions

Achieve high accuracy on almost any pallet passed through with a forklift truck.

| <b>Orientation</b>                  | Multi-directional scans with pallet positioned on forklift truck                                                                      |
| <b>More Information</b>             | <a href="http://www.mt.com/TLD970">www.mt.com/TLD970</a>                                                                              |

Note: The TLD970 is currently only available in select markets. Inquire with your local representative about availability in your area.

# TLF820/VFS120 Forklift Scales

## Unbeatably Robust

Designed for tough industrial environments, METTLER TOLEDO forklift scales set the standard for reliability, safety and accuracy in heavy-use applications. Whether your business is freight logistics, shipping or warehousing, on-board weighing can significantly speed up your processes.

► [www.mt.com/forkliftscales](http://www.mt.com/forkliftscales)

Cut maintenance costs in half with a forklift scale that requires no shimming and infrequent calibration thanks to patented three-point suspension.

### Easy, Seamless Integration

Weight data is transmitted seamlessly from an embedded smart PC. Preconfigured workflows offer step-by-step guidance, reducing effort and human error.

### Long Life, Doesn't Break Down

The heavy-use scale carriage enables you to keep working when other scales break down. Minimal maintenance and a long lifespan ensure low cost of ownership.

### Reduce Risk of Accidents

The scale has a high-visibility window, making it easy for the forklift operator to see loads, position forks for lifting and avoid accidents.

## Onboard Pallet Weighing

### VFS120/TLF820 Forklift Scales

Our forklift scales can be installed on any Class II or III forklift truck and are an ISO-approved accessory compatible with any other ISO-approved accessories.

# Smart Integrated Solutions

## Maximize Operational Efficiency

Dimensioning is only one part of the puzzle. A fully integrated dimensioning, weighing and scanning solution for pallets will help you take your efficiency to the next level. There isn't a one-size-fits-all solution when it comes to pallet data capture. Your weighing and dimensioning requirements depend on volumes, processes and measurement time windows. Understanding the different solutions that are available will help you determine what is best for your operation.

## Learn More, Visit our Website

For more information on creating your own seamlessly integrated solution, visit:

► [www.mt.com/freight-integration](http://www.mt.com/freight-integration)

## In-Motion Dimensioning and Weighing

Up to 720 pallets per hour

Fully automatic. Drive-through solution that automatically captures and merges weight, dimensions and ID.

Dynamic dimensioning is combined with forklift weighing. Data management is optional.

20 seconds

High-volume, time-critical operations

## Make the Most of Your Data

Regardless of the solution, there are a number of features that help you to make the most of your data...

### Data Management

Sophisticated data management software merges, stores and transfers data from different components. Statistical data can be used for planning, trend analysis and operational optimization.

### System Health Data

Remote system monitoring keeps an eye on the performance and health of your system, helping you to plan for maintenance, service and eventual replacement in advance to keep operations running at peak efficiency.

### Image Capture

Take a picture of each pallet as it is measured for customer claims, communication, proof of measurement and to justify non-stackable surcharges.

# Providing Service Solutions Across Your Value Chain

We provide you with a tailor-made service solutions based on our four values: **Uptime, Performance, Compliance and Expertise.** This helps you to maintain efficient operations, deliver high quality data and ensure that your investment continues to pay off over time.

► [www.mt.com/service](http://www.mt.com/service)

**Our instruments meet the highest technical standards.**  
**Are you aware of your most important performance-assurance needs?**

**Are fast intervention and turnaround times crucial to meet your shipment and delivery dates?**

## Uptime

You require every minute of up-time. This means guarding against equipment breakdown, parts failure and wear and tear. issues.

**Are your measurement results meeting productivity, quality and regulatory requirements?**

## Performance

With periodic preventive maintenance, you achieve consistently accurate results, avoiding unexpected downtime and saving money.

**Does the accuracy of your measurement equipment meet your quality requirements?**

## Compliance

Whether you operate under ISO 9001 or strict weights and measures regulations, you require documented testing procedures and an accepted calibration certificate.

**Do you know how to apply metrological concepts, safety procedures and measurement best practice to optimize your process?**

### **Expertise**

Ensure you get trained and consulted on measurement technology, regulations and industry best practice..

## **Over 5 000 Factory-Trained Service Specialists Worldwide**

### **Global Presence**

We serve our customers worldwide with one of the largest sales and service networks in the industry to assist you in increasing the efficiency, cost-effectiveness, safety and reliability of your operational processes. Our geographically-focused market organizations ensure close relationships with users. These organizations have the flexibility to adapt support and service offerings to different user requirements.

Our highly trained and authorized service technicians help guarantee:

- Continuous operational manufacturing quality and maximized uptime.
- Comprehensive, audit-proof and fully traceable electronic certificates.
- Consistency in procedures and certified, traceable tools.
- Highest operational performance for your compliance needs with combined equipment installation and qualification.

# PFA584(x) Floor Scales

## Globally Configurable Solutions

We know the needs of every industry are different, which is why the PFA584 is not a one-size-fits-all solution. We have taken the pain out of the floor scale configuration process by creating an easy-to-order, globally standardized set of components that can easily be mixed-and-matched to formulate your ideal scale.

► [www.mt.com/PFA584](http://www.mt.com/PFA584)

Significantly ease the ordering and scale up process with flexible customization and expert METTLER TOLEDO consultancy. It's easy to see why this solution is ideal for multinational companies, because it eliminates the need to order different configurations country-by-country.

### Accurate Out-of-the-Box

By storing the factory calibration values within the scale, you get out-of-the-box accuracy and easy setup.

### Faster Scale-Up

The ability to mix-and-match from a set of globally approved components significantly eases the ordering and scale-up process.

### Global Approvals for Consistency

Metrology: OIML, NTEP, CPA  
Wireless: FCC, CE/RED, SRRC  
Safety: UN38.3, IEC/EN61010,  
Ex: IECEx, ATEX, FM approved for  
Hazardous Areas Zone 1/21, 2/22  
and Div 1/Div 2

## Premium Components with Global Approvals

### Mix and Match Your Ideal Configuration

# BFA231/BFA236 Floor Scales

## Simple, Reliable Weighing Performance

These scales' rocker-foot load-cell suspension enables reliable basic-weighing accuracy in dry and wet environments. Simple designs in stainless or mild steel use easy-loading ramps and above-ground installation.

► [www.mt.com/BFA231-236](http://www.mt.com/BFA231-236)

Rocker-foot suspension is self-aligning and self-centering. It balances side shocks and transmits force vertically into the load cell. Because only vertical forces are transmitted, it eliminates side load and bump impact for better accuracy and longevity in industrial environments. The ramp configuration allows drive-on or drive-through weighing.

### Quick Start-Up

These scale indicators and platforms are connected and calibrated in our plant so they are ready to commission and operate when they reach yours.

### Easy, Flexible Installation

The rocker foot can be installed with or without anchor plate to allow material handling with or without side load.

### Increase operation speed

The simple and convenient menu configuration and intuitive setup makes the BFA231/BFA236 easy to use. It requires minimal operator training and measurably improves production efficiency.

## BFA231 and BFA236

# PTA455/PTA459(x) Pallet Scales

## Movable Weighing with Easy Loading

**PTA455/PTA459** – the pallet scales for goods shipping and receiving, manufacturing and packaging. These rugged, reliable pallet scales are made of hot-galvanized mild steel or stainless steel. A wide range of options and accessories help these versatile scales to meet your requirements. Let us find the right solution for your application.

► [www.mt.com/PTA455](http://www.mt.com/PTA455)

► [www.mt.com/PTA459](http://www.mt.com/PTA459)

PTA pallet scales come with wheels and a handle so you can weigh wherever it is most convenient for you (product option / accessory). PTA455 comes in galvanized mild steel for dry and light-wet applications, while the PTA459(x) stainless-steel version allows use in wet applications in both safe and hazardous areas.

### Open Design for Efficient Cleaning

The frame design with its open tubes makes it easy for you to clean and flush out.

### Adaptable to Your Needs

A variety of options and accessories make the platform highly flexible. Choose different materials, surface treatments, wheels, handles and resolutions.

### EU Standard Pallets and Beyond

PTA scales are designed to fit the most common EU pallet size. Other dimensions or a tailored mechanical design are available on request.

## PTA455/PTA459(x) Pallet Platforms

# PJA434/PJA439 Pallet Truck Scales

## For High-Productivity Mobile Weighing

Our pallet truck scales are designed to integrate easily into filling, inventory, load management or counting applications anywhere in your workplace. Basic mobile weighing can help increase your throughput and process flexibility.

► [www.mt.com/PJA](http://www.mt.com/PJA)

Four load cells embedded into the forks of a standard pallet truck make this mobile solution a fully functional scale capable of lifting, weighing, and moving items anywhere in your work area. Unique FlexBolt load-cell fixation eliminates the potential negative influence of stress on the chassis caused by the load, ensuring superb accuracy and repeatability.

### Boost Time and Cost Savings

Weigh and move at the same time – no independent material load-in time added.

### Fit to Your Processes

Different wheel options help you work anywhere on any floor condition. The ICS4x9 scale indicator lets you perform multiple weighing functions.

### Save Space and Clean Freely

Because it requires no pit construction, your workspace retains maximum flexibility. Easy movement also means easy floor cleaning!

## Designed for Seamless Integration

## Global Services

### Optimize Operational Efficiency

Our service offering includes an extensive range of services to help you preserve the value of your investment.

#### Comprehensive Service Agreements

A comprehensive service agreement is tailored to your operational requirements. It includes preventative maintenance, parts, labor, travel and guaranteed response time for repairs. This is your most cost-effective assurance against downtime, low-quality results and unbudgeted expense.

#### Customer-Specific Requirements

METTLER TOLEDO is familiar with local needs and specific customer requirements. This includes needs for local spare parts stock, special service reports, technical training, failure analysis, product upgrades and interaction with system integrators.

#### Repair Services

METTLER TOLEDO is your single source for maintenance and repair of dimensioning, weighing and scanning equipment. In case of breakdown, we will provide services and parts in a cost-effective manner to get you up and running as quickly as possible.
