

Good Weighing Practice™

SOP Consulting Service

Audit-Proof SOP

Cost-Efficient Process

Global Harmonization Made Easy

Easy Compliance – Fast Implementation
Your New Weighing SOP

METTLER TOLEDO

Standard Operating Procedure Consulting Service

Change your SOPs without worry. METTLER TOLEDO now offers a consulting service to make your SOPs audit-proof. We can help facilitate testing of your weighing equipment that is both time- and cost-effective. The SOPs will be based on our proven Good Weighing Practice Weighing Standard and GWP® Verification.

The SOP covers the quality management of balances and scales with regards to their operational and performance qualification.

Based on the findings and recommendations in GWP® Verification concerning routine testing parameters, METTLER TOLEDO helps you streamline and harmonize your weighing SOP. Because of a risk-based scientific testing strategy, you can realize cost savings and optimal weighing process performance without compromising compliance.

Audit-Proof SOP

The SOP offering and methodology builds on the recognized global weighing standard, Good Weighing Practice™, and GWP® Verification service. SOP Consulting can be applied to weighing equipment from any manufacturer in any industry and workplace.

Cost-Efficient Process

Save costs and time when changing your weighing SOPs with the help of the weighing expert. Align your weighing SOPs with risk-based testing strategies and remove unnecessary testing efforts.

Global Harmonization Made Easy

Ensure the same weighing SOP across regions or sites. Address any questions concerning testing strategies locally, while using best practices, saving costs and speaking the same process language globally.

Your new SOP within just 4 days

We offer a Basic 4-Day Package to establish a new SOP or to adapt an existing one. An SOP consultant and weighing expert leads the project and writes the SOP.

Using the GWP® Verification as its basis, the weighing SOP includes:

- Frequency of performance verification testing
- Tests to perform
- Weight standards to use
- Testing tolerances based on weighing process requirements

This requires a preparation on both sides before the project starts, including a visit to the customer site, milestone meetings after each day, SOP review rounds and a final sign-off.

Customize the offering to meet your needs

This service package can be customized, with additional days required, depending on each unique SOP writing project.

You can receive:

- SOP harmonization across several locations
- Additional SOP content, such as design and installation qualification, evaluation and installation
- Consulting on weighing environment improvements
- Weighing compliance training
- Training on scale testing and handling
- Participation in regulatory or internal audits after SOP implementation
- Support after SOP release

METTLER TOLEDO Services

Ensure Consistently Reliable Results

From evaluating your needs to selecting the right scale to supporting your daily routine operation, the METTLER TOLEDO Sales & Service Team will be with you every step of the way. Our expertise means you can enjoy excellent performance, maximum uptime and full compliance with your industry requirements.
