Declaration of conformity

We, Mettler-Toledo (Albstadt) GmbH
Unter dem Malesfelsen 34
D-72458 Albstadt

declare under our sole responsibility that the product

Shop Scale
Model UC3 - C/CDD/hTouch

starting from serial number 2542655

to which this declaration relates, is in conformity with the following standards and directives:

Calibration Instructions

Important note on calibrated scales in EEC-countries

Factory calibrated scales carry the preceding identification on the packaging label.

Scales identified by the green "M"-Label applied on the calibration mark can be operated immediately.

Scales calibrated in two steps carry the preceding identification on the label applied to the package.

These scales have already been calibrated (declaration of construction conformity according to EN 45501-8.2) and have to be calibrated again on the working place. This calibration has to be conducted by the certified METTLER TOLEDO Service.

Please contact your METTLER TOLEDO technical service.

Shop scales, used for legal trade are submitted to calibration.

Please respect the current calibration directives in your country.
Safety Instructions

⚠️

Do not use the scale in the proximity of an explosive gas mixture, of vapours, steam, or dust!

Any electrical device, not equipped with a specific "e" type of protection and used in an area with an explosive atmosphere represents an important danger in this environment!

To prevent any accident, only qualified service personnel is authorised to open this device!

⚠️

CAUTION!
DANGER OF EXPLOSION IN CASE OF INPROPER REPLACEMENT OF BATTERY.
DISPOSAL OF USED BATTERIES ACCORDING TO INSTRUCTIONS.

Installation Instructions

In general, your scale is part of a scale network. The installation, levelling and application are handled by METTLER TOLEDO or an authorised dealer. During the introduction you will be comprehensively trained and receive all necessary documentation. Your scale should only be connected to the mains with the power cord supplied.

The water level is used to level your scale. It is fixed at the back of the device. The correct alignment (air bubble has to be in the centre of the water level) of the device can be achieved by adjusting the adjustable scale feet. The water level should be checked regularly to assure a correct level reading. When moving the scale, the level should be checked and corrected if necessary.

right

wrong
Zero Setting device
and Zero setting of scale

The scale is equipped with an automatic zero setting device which means that small weight modifications are compensated automatically (e.g. rests of grease on the weighing platform). The zero setting device is deactivated if a packaging weight is tared. After cleaning from dirt with the scale switched on, the display can read:

- either a negative value,
- or "_ _ _ _ _" segments can be lit.

Solution:

- Press the \( \text{K} \)-and then the \( \text{O} \)-key.

If the error message appears again:

- Switch the scale off and on again. (Automatic zero-setting at switch-on)

Instructions concerning thermal papers
and thermal labels

The printer of the UC shop scales is a thermal printer. For this thermal printer, you should only use thermal paper or thermal labels. These two types of paper have been submitted to a long-time test by Mettler Toledo and then released. They are also approved by the calibration authority to be used on UC shop scales.

If you use thermal paper or thermal labels other than those mentioned above, the print quality and lifetime of the print head risk to be diminished. In such a case, warranty for the thermal printer is void.
Maintenance Service Scale

⚠️
Prior to any intervention always pull mains plug from wall outlet.

Cleaning

Switch off scale and pull mains plug.
Clean operating unit with a moist (not wet) cloth.
Connect mains plug and switch on scale again.

⚠️
Do not use any solvent based cleaners.
Clean with a normal detergent only.

Cleaning of print head

Switch off scale and pull mains plug.
Open door.
Receipt printer: Press release lever backwards.
The print head folds towards the front.
Label printer: Press release lever downwards.
The print head folds upwards.
Take off cap from the cleaning pen.
Clean the front part of the print head with the moist tip of the pen.
Receipt printer: Press print head upwards until it latches again.
Label printer: Press print head downwards until it latches again.
Close cleaning pen with cap.
Connect mains plug and switch on scale again.

⚠️
For cleaning of the print head only use the included cleaning pen.
With other objects the print head could be damaged.
Replacement of receipt roll

- Remove the core of the empty roll.
- Press release lever **backwards**.
  The print head folds towards the front.
- Insert new receipt roll as shown in opposite illustration.
- The leading edge of the paper is on the left side.
- Pull thermal paper towards front until correct tension is reached.
- Press print head **upwards** until it latches again.
- Tear off protruding paper.

Replacement of label roll

- Remove the core of the empty roll.
- Press release lever **downwards**.
  The print head folds upwards.
- Pull green wind-up spindle out and remove carrier tape.
- Insert new label roll as shown in opposite illustration.
- The leading edge of the paper is on the left side.
- Insert carrier tape in wind-up spindle and push wind-up spindle back.
- Press print head **downwards** until it latches again.
- Press paper feed key.
Maintenance of Service Scale with Linerless Printer

Prior to any intervention always pull mains plug from wall outlet.

Cleaning of print head

- Switch off scale and pull mains plug.
- Open door.
- Press release lever downwards. The print head folds upwards.
- Take off cap from the cleaning pen.
- Clean the front part of the print head with the moist tip of the pen.
- Press print head downwards until it latches again.
- Close cleaning pen with the cap.
- Connect mains plug and switch on scale again.

For cleaning of the print head only use the included cleaning pen. With other objects the print head could be damaged.
Replacement of Linerless paper roll

- Remove the core of the empty roll.
- Press release lever **downwards**.
  The print head folds upwards.
- Insert new linerless paper roll as shown in opposite illustration.
- The leading edge of the paper is on the left side.
- Press print head **downwards** until it latches again.
- Press paper feed key 🍂.

Tare
Types and use

Tare printout on customer receipt (multiple tare)

Tare will be printed on the customer receipt and marked with a "T".

Multiple tare means that in case of multiple tare-up (by tare key) the tare values of the single bookings are revealed on the customer receipt at tare printout.

Example:
- Place weight 0.100 kg, tare
  --> tare display 0.100 kg
- Place weight 1.000 kg, book article
  --> tare printout 0.100 kg
do not discharge!
- Place weight 0.200 kg, tare
  --> tare display 1.300 kg
- Place weight 2.000 kg, book article
  --> tare printout 0.200 kg
eetc.

Tare compensation of an empty container

- Place empty container on weighing platform
- Press tare key
- Place filled container on weighing platform
- Select PLU and enter unit price
- Book with your operator key

Tare will be deleted after booking and discharge of scale.

Tare fixation for multiple bookings

- Place empty container on weighing platform
- Press tare key
- Fixation key
- Bookings
- Fixation key

Weight indication at zero

Fixation of tare and unit price, FIX on the display.

Tare and unit price are not deleted when discharged.

Fixation of tare and unit price is abolished.
**Tare manual entry**

- Tare manual key
- Initiation of tare manual entry
- Enter tare value in grams
  
  e. g. 1 2 0
- Confirmation of tare manual entry
- Place filled container on weighing platform
- Book with your operator key

Pay attention to graduation of scale (1g, 2g or 5g)

Tare value and net weight value are shown.

Tare will be deleted after booking and discharge of scale.

Tare fixation possible

**Tare memory**

- Tare manual key
  
  e. g. 1
- Call up tare memory Nbr. 1
- Booking

Created in data maintenance

Tare will be deleted after booking and discharge of scale.

Tare fixation possible
**Tare direct key**

- Tare direct key (e.g., 200g)
  - Direct key created
  - Tare value and net weight value are shown.
  - Tare fixation possible
- Booking
  - Tare will be deleted after booking and discharge of scale.

**Operator tare**

- Place empty container on weighing platform
  - Weight indication at zero
  - Tare value and net weight value are shown.
  - Tare will be deleted after booking and discharge of scale.
- Press tare key
- Assign to your operator key
- Booking

**Plu Tare**

- Tare which is fixed to a PLU.
  - Has to be created in the data maintenance as well
Operator

Login and Logoff

Operator key logoff

- The operator key is released during logoff.
- Press Code key
- Enter operator number
- Press operator key you wish to logoff

Example:

\[
\begin{align*}
\text{press code key} & \quad \text{example: 12} \\
\text{enter operator number} & \\
\text{press operator key to logoff} & \\
\end{align*}
\]

For \( V_1 \) choose 1; for \( V_2 \) choose 2, etc.

Operator key temporary logoff

- The operator key remains saved during temporary logoff until an operator logs in again.
- Press Code key
- Operator key you wish to logoff

Operator key login

- At login, a personal operator key is assigned to the operator.
- Press Code key
- Enter operator number
- Please select an operator key
- To confirm, press the proposed key

Example:

\[
\begin{align*}
\text{press code key} & \quad \text{example: 12} \\
\text{enter operator number} & \\
\text{select operator key} & \\
\text{confirm with proposed key} & \quad \text{for \( V_1 \) choose 1; for \( V_2 \) choose 2, etc.} \\
\end{align*}
\]

If the selected key is already assigned, the scale proposes a free operator key.
Void

Types and use

**Void of last item**

- Press void key
- Your operator key
- Press void key again
- Create further bookings or customer receipt

All bookings are shown. The last booked item is highlighted.

Highlighted item will be deleted and indicated on the customer receipt as deleted.

**Void of previous item**

- Press void key
- Your operator key
- Select item with scroll keys
- Press void key again
- Create further bookings or customer receipt

All bookings are shown.

Item is highlighted

Highlighted item will be deleted and indicated on the customer receipt as deleted.
Void of customer receipt

Void of a customer receipt is carried out in a separate menu. Access with code number only.

- Press code key
- Press void key

**Display of receipt;**
Messages:
- Receipt will be cancelled
- Receipt is cancelled
Printout of cancelled receipt.

Number of receipt you want to cancel.

- Enter code number
- Press asterisk key

- Enter receipt number
- Press asterisk key

Cancel next receipt, or return to sales mode with the code key.
Self-Service (Self-S. Mode)

Operation with symbol keys

- Place goods to weigh on weighing platform
- Press symbol key or number key
- Label is printed
- Remove label and stick it to weighed goods
- Place next goods to weigh on weighing platform

Error message "Underload detection"

- Scale emits a continuous beep

"Underload detection" configured, scale detects underload.

Solution:
- Zero setting of scale
- Leaving the self-service application
- Eliminate cause for underload.
Change from the self-service mode
(operator keyboard)

You have selected the self-service mode by mistake and wish to go back to the mode Sale.

Display in self-service mode.

Ware auflegen

Service scale
Press these two keys immediately after each other.

Compact scale
Press these two keys immediately after each other.

Press keys
Change to the mode Sale with the short code.
Functions in the Self-Service mode (180 keys overlay)

The functions can only be selected if the weight display shows zero “0000” or underload “--------”.

Leave Self-S. mode

- Press key Nbr. 1 (or 169) and key Nbr. 12 immediately after each other within 0.5 seconds.
  
  Following selection can be made:
  Sale, Self-Service, Inventory, Data maintenance, price change, turnover evaluation or configuration

Sensor adjustment

- Press key Nbr. 1 (or 169) and key Nbr. 144 immediately after each other within 0.5 seconds.
  
  In case of error messages related to the label.
  e.g.: U WRONG LABEL

Primary tare off/on

- Press key Nbr. 1 (or 169) and key Nbr. 156 immediately after each other within 0.5 seconds.
  
  Tare is valid for all articles
  e.g.: same container.

Zero setting

- Press key Nbr. 1 (or 169) and key Nbr. 168 immediately after each other within 0.5 seconds.
  
  Apply if weight indication of scale does not show 0000.

Label feed

- Press key Nbr. 1 (or 169) and key Nbr. 180 immediately after each other within 0.5 seconds.
  
  Empty label is pushed out; apply for example after change of paper.
Functions in the Self-S. Mode (100-keys overlay)

The functions can only be selected, if the weight indication shows "Zero "0000" or underload "------".

Leave Self-S. mode
- Press key Nbr. 1 (or 91) and key Nbr. 10 immediately after each other within 0.5 seconds.

Sensor adjustment
- Press key Nbr. 1 (or 91) and key Nbr. 70 immediately after each other within 0.5 seconds.

Primary tare off/on
- Press key Nbr. 1 (or 91) and key Nbr. 80 immediately after each other within 0.5 seconds.

Zero setting
- Press key Nbr. 1 (or 91) and key Nbr. 90 immediately after each other within 0.5 seconds.

Label feed
- Press key Nbr. 1 (or 91) and key Nbr. 100 immediately after each other within 0.5 seconds.

Function key "Nbr. 1"
- Leave Self-S. mode "Nbr. 10"

Function key "Nbr. 91"
- Sensor adjustment "Nbr. 70"
- Primary tare off/on "Nbr. 80"
- Zero setting "Nbr. 90"
- Label feed "Nbr. 100"
Functions in the Self-S. Mode (50-keys overlay)

The functions can only be selected, if the weight indication shows "Zero "0000" or underload "------".

Leave Self-S. mode

- Press key Nbr. 1 (or 46) and key Nbr. 5 immediately after each other within 0.5 seconds.

Sensor adjustment

- Press key Nbr. 1 (or 46) and key Nbr. 35 immediately after each other within 0.5 seconds.

Primary tare off/on

- Press key Nbr. 1 (or 46) and key Nbr. 40 immediately after each other within 0.5 seconds.

Zero setting

- Press key Nbr. 1 (or 46) and key Nbr. 45 immediately after each other within 0.5 seconds.

Label feed

- Press key Nbr. 1 (or 46) and key Nbr. 50 immediately after each other within 0.5 seconds.

Function key "Nbr. 1"

Function key "Nbr. 46"
Functions in the Self-S. Mode (25-keys overlay)

The functions can only be selected, if the weight indication shows "Zero "0000" or underload "------".

**Leave Self-S. mode**
- Press key Nbr. 1 (or 21) and key Nbr. 5 immediately after each other within 0.5 seconds.
  - Following selection can be made: Sale, self-service, inventory, data maintenance, price change, turnover evaluation or configuration

**Sensor adjustment**
- Press key Nbr. 1 (or 21) and key Nbr. 10 immediately after each other within 0.5 seconds.
  - In case of error messages related to the label e. g.: **WRONG LABEL**

**Primary tare off/on**
- Press key Nbr. 1 (or 21) and key Nbr. 15 immediately after each other within 0.5 seconds.
  - Tare is valid for all articles e. g.: same container.

**Zero setting**
- Press key Nbr. 1 (or 23) and key Nbr. 25 immediately after each other within 0.5 seconds.
  - Apply if weight indication of scale does not show **0000**.

**Label feed**
- Press key Nbr. 1 (or 21) and key Nbr. 29 immediately after each other within 0.5 seconds.
  - Empty label is pushed out; apply for example after change of paper.

---

- Function key "Nbr. 1"
  - Leave Self-S. mode "Nbr. 5"
  - Sensor adjustment "Nbr. 10"
  - Primary tare off/on "Nbr. 15"
  - Zero setting "Nbr. 20"

- Function key "Nbr. 21"
  - Label feed "Nbr. 25"
Prepacking

Prepacking:
In the prepacking mode, labels can be created for article labelling. Printout activation can be selected manually or automatically.

Select PP-mode

- Press mode key

Quick start with 23 or

- Scroll down key

to

- Press key

- Scroll down key

to

- Press key

The scale display shows "Prepacking".
Operator Service

1. Enter PLU number

2. Place goods to weigh on weighing platform

3. Press operator key V1

4. further labelling

In case of manual activation: in case of automatic activation, the printout is carried out at stable weight of scale.

In the automatic printout mode the label has to be requested manually with an operator key for printing a piece PLU or for a manual price entry.

Article by piece
(Multiple labelling)

1. Enter PLU number

2. Asterisk key

3. Carrier tape or labels

4. Asterisk key

5. Enter number of labels

6. Asterisk key

or PLU direct key; further possibilities refer to page 20 cont.

confirm

0 = Carrier tape; 1 = Labels

confirm

e. g.: Print 7 labels of selected article by piece.

Printout of selected number of labels.
Label layout key

💡 The label layout key allows you to select another label layout, e.g. to obtain shorter labels, or if you need less information on the labels resp. short term endless labels, or for variable label lengths.

Conditions: label layout key configured; menu item 833 keyboard configuration
label layout created; menu item 8312 label layout (Name#1.xml)

- Label layout key
  - Change by repeated pressing of key.

Symbol for label layout

1 2 3

- Enter Plu-number
- Place goods to weigh on weighing platform
- Press operator key V1
- Further labelling
  - In case of manual activation.
**Date key**

The date key allows you to modify the different dates (packing date, sell date or best before date) for the next labelling.

Conditions: Date key configured; **menu item 833 keyboard configuration**

NonSalesMode (- Data maintenance)

Article (411)
create, list, delete

Quick start with 411:
In this window you may enter the base data of an article or modify the data of an existing article.

• Asterisk key confirm

• Enter PLU-Nbr. PLU-Nbr. of new article.

• left arrow key Department number of new article.

* PLU-Nbr. max. 6 digits

Dept.-Nbr. max. 6 digits; this information is necessary if the new article has to be transmitted to all scales in this department.
Entries tab "Data 1":

1st price: Sales price 1, this price is always needed for selling. Note: This price is linked to the value added tax rate VAT 1 in order to calculate the VAT share of the article turnover. Every article may have two sales prices which can be selected via the keyboard of the scale (cash register) while selling.

VAT Nbr.: Value added tax number for price 1. In this field, the VAT-Nbr. of the VAT-rate (e.g. 7%) which should be valid for this article has to be entered. A corresponding VAT-table containing the desired VAT-number with its appropriate VAT-rate, e.g. Nbr. 1 = 7% (refer to VAT, page ##) must have been created. This entry is necessary only if the VAT turnover share is required.

UAN: Max. 13 digits; in case less than 13 digits are entered, the missing digits are preceded by leading zeros. The entry is only necessary for instance if the article number in the EAN of a prepacking article has to be encrypted.

2nd price: Sales price 2, this price is only needed if several sales prices are to be used. This is always the case if the same article must be taken into account in the turnover with different VAT-rates, e.g. an article as a food article and as a snack article. Note: This price is linked to the value added tax rate VAT 2 in order to calculate the VAT share of the article turnover.

VAT Nbr.: Value added tax number for price 2. In this field, the VAT-Nbr. of the VAT-rate (e.g. 15%) which should be valid for this article has to be entered. A corresponding VAT-table containing the desired VAT-number with its appropriate VAT-rate must have been created.

AtGp-Nbr.: Article group for this article. Entry necessary.

Tare Nbr.: In this field, the Tare-Nbr. of the tare value (e.g. 4 grams) which should be valid for this article has to be entered. A corresponding tare table containing the desired tare number with its appropriate tare weight must have been created.

Name: Article description with a maximum of 100 characters.
Entries at tab "Data 2":

Short text: short form of the article text with max. 20 digits, printout on receipt and labels if created.

Purchase price: Purchase price of article.

Customer ID: Shelf number resp. storage location of the article (Self-S. mode)

Product tip mode:

Auto: Product tip appears on the display. Product tip is shown and printed. The operator decides what to do with the product tip.

Text Nbr.: The product tip number valid for this article has to be entered here. A corresponding product tip table (refer to Product tip) containing the desired text number, has to be created.

PLU type

Article by weight: Weighed article

Article by piece:

Application of the product tip:

Marking for a PLU with product tip

Display with key; if booked now, product tip is printed on customer receipt.
Entries at tab "Data 3":

Smiley: Information about the articles sales value for the company.

- **without:** The smiley function for this article is switched off.
- **Smiling:** "Good article" for the company.
- **Weeping:** "Bad article" for the company.

Price overwrite admitted: The price of the article called up at the scale/cash register can be overwritten by another price (call up article, press [#] key and enter new price).

Article locked: no sales of this article until release.
Switch to tab Label 1.

Entries tab „Label 1“:

Template: Created label layouts.

Fonts: TLU Font 1 .. 4: Type (01 .. 101) for TLU lines 1 .. 4.
Incredient Font: Type (01 .. 101) for printed ingredients.

Texts: Advertising text: Advertising text which is printed onto each label.

Company name: Company name which is printed onto each label.

Asterisk key: Confirm selections.

If this field is shown, you can display the available information in form of a list with the key and make your choice.

Text: Date text which is printed.

- Asterisk key confirm, enter number of next date text.

Delete date text - Quick start with 453:
In this window you can delete the date text.

Entries tab "Delete":

Text Nbr.: Enter number of date text.

- Asterisk key confirm

Confirm deletion.
Text - Company names (454)
create/modify, delete

Quick start with 454

Various company names can be printed on the label.

- Asterisk key  
- confirm

- Scroll down
- Select company name.

- Asterisk key  
- confirm

- Enter number of new company name.

- Asterisk key  
- confirm
**Text:** Company name which is printed.

- Asterisk key confirm, enter number of next company name.

---

**Delete company name - Quick start with 454;**

In this window you can delete the company name.

**Entries tab "Delete":**

**Text Nbr.:** Enter number of company name.

- Asterisk key confirm

**Question**

Delete text? [Mode][*]

- Asterisk key Confirm deletion.
Text - Branch texts (457)
create/modify, delete

Quick start with 457:
A branch description can be created which will appear in addition to the receipt header text on each receipt of the devices. This branch text will also be printed on each turnover receipt.
Prerequisite: The branch text has been selected in the printout configuration 852

1. Asterisk key confirm

2. Scroll down

3. Asterisk key confirm

4. Enter number of new branch text.

5. Asterisk key confirm
**Text:** Branch text which is printed.

- Asterisk key \[\text{confirm, enter number of next branch text.}\]

**Delete branch text - Quick start with 457:**

In this window you can delete the branch texts.

**Entries tab "Delete":**

**Text Nbr.:** Enter number of branch text

- Asterisk key \[\text{confirm}\]

**Question**

Delete text? [Mode][*]

- Asterisk key \[\text{Confirm deletion.}\]
**Text - Header texts (458)**

*create/modify, delete*

**Quick start with 458**

The receipt header text appears first on top of the total receipt. For Self-Service scales (UC3-GT), this text is of no importance.

You can create, modify or delete receipt header texts here.

- Asterisk key confirm

- Scroll down Select header texts.

- Asterisk key confirm

- Enter number of new header text.

- Asterisk key confirm
Text: Enter header text which is printed on the receipt.

- Asterisk key confirm, enter number of next header text.

Delete header text - Quick start with 458:
In this window you can delete the header text.

Entries tab "Delete":

Text Nbr.: Enter number of header text.

- Asterisk key confirm

Question

Delete text? [Mode] [*]

- Asterisk key Confirm deletion.
Text - Footer text (459)
create/modify, delete

Quick start with 459:
The receipt footer text appears last at the bottom of the total receipt. For Self-Service scales (UC3-GT), this text is of no importance.

You can create, modify or delete receipt footer texts here.

- Asterisk key ➜ confirm

- Scroll down ➜ Select footer texts.

- Asterisk key ➜ confirm

- Asterisk key ➜ confirm

Enter number of new footer text.

- Asterisk key ➜ confirm
**Text:** Enter footer text which is printed on the receipt.

- Asterisk key    confirm, enter number of next footer text.

---

**Delete footer text - Quick start with 459:**

In this window you can delete the footer text.

---

**Entries tab "Delete":**

**Text Nbr.:** Enter number of footer text.

- Asterisk key confirm

**Question**

Delete text?
[Mode][*]

- Asterisk key Confirm deletion.
Text - Product tip (45+1)
create/modify, delete
Quick start with 45+1

Product tips are informations concerning single articles or groups of articles. They serve as additional information for the operator (display) and the customer (printout on receipt). The assignment of a product tip to an article is carried out in the article maintenance (511; Tab 2). You can create, modify or delete product tips here.

* Asterisk key confirm

• Scroll down Select product tip.

• Asterisk key confirm

• Asterisk key

Enter number of new product tip.

• Asterisk key confirm
Text: Enter product tip which will be displayed or printed on the receipt.

- Asterisk key confirm, enter number of next product tip.

Delete product tips - Quick start with 45+1:
In this window you can delete the product tip.

Entries tab "Delete":

Text Nbr.: Enter number of product tip.

- Asterisk key confirm

Question

Delete text?
[Mode] [*]

- Asterisk key Confirm deletion.
**Text - Operator text (45+2)**

**create/modify, delete**

**Quick start with 45+2**

A branch description can be created which will be printed on each receipt. The branch text also appears in the turnover evaluation.

Prerequisite: The branch text has been activated in the Sale configuration of the devices (651 receipt1). You can create, modify or delete branch texts here.

- Asterisk key confirm

- Scroll down

- Asterisk key

Select operator text. confirm

Enter number of new operator text.

- Asterisk key confirm
Enter operator text which will be displayed or printed on the receipt.

- Asterisk key (confirm, enter number of next operator text).

Delete operator text - Quick start with 45+2:
In this window you can delete the operator text.

Entries tab "Delete":
Text Nbr.: Enter number of operator text.

- Asterisk key (confirm)

Question
Delete text? [Mode][*]

- Asterisk key (Confirm deletion)
**Tare (47)**
create/modify, delete

*Quick start with 47;*

Tare values can be assigned to articles by weight. These tare values are saved with a tare number in a tare table. Later on, the tare weight value is assigned to the corresponding article via the tare number (511).

**Consider graduation:** For the tare weight value the graduation of the connected scales has to be considered, for instance a scale with 2 gram steps. If the scale cannot show the entered tare weight value, the scale rounds up to the next appropriate weight value.

You can create, modify or delete tare values here.

![Tare Table Screenshot](image)

- **Asterisk key**
  - Confirm

- **Enter tare Nbr.**
  - Enter tare Nbr. of tare value.
  - Enter department number if tare is to be valid for another department.

- **Left arrow key**
  - Confirm entries.

- **Asterisk key**
**Name:**  Description of tare value e.g. "paper, heavy"

**Value:** Enter weight value in grams (consider graduation of scale)

**Type:** Indication of weight or percentage (of gross weight)

- Asterisk key  Confirm entries, enter number of next tare value.

---

**Delete tare - Quick start with 47:**

In this window you can delete the tare values.

---

**Entries tab “Delete”:**

**Dept. Nbr.:** Enter department number.

**Tare Nbr.:** Enter tare Nbr.

- Asterisk key  confirm

---

**Question**

Delete tare?

[Mode] [*]

- Asterisk key  Confirm deletion;
**VAT (48)**

**create/modify, delete**

**Quick start with 48:**

The various VAT-rates necessary can be created here. Their values may then be linked via the VAT-number to the articles in order to reveal the appropriate VAT-share while using the articles.  
*(511; Tab 2)*

You can create, modify or delete VAT-rates here.

- **Asterisk key**

- **confirm**

- **Enter VAT-Nbr.**

- **Enter VAT-Nbr. of VAT-value.**

- **Asterisk key**

- **Confirm entries.**
Name: Enter description of VAT-rate.
Wert: Enter percentage of VAT-rate.

• Asterisk key  Confirm entries, enter number of next VAT-rate.

**Delete VAT - Quick start with 48:**
In this window you can delete the VAT-rates.

Entries tab "Delete":

VAT Nbr.: Enter VAT-number

• Asterisk key  confirm

Question

Delete VAT number?
[Mode] [*]

• Asterisk key  Confirm deletion.
Barcode(49)
create/modify, delete

Quick start with 49;

This function is used to create a bar code list. The appearance of the bar code is defined here. Each code is saved with a number. With this number, the bar code can be assigned either to departments, devices or for instance to a label definition as well. The bar codes can be printed on the total receipts or on the labels for the precise scanning of articles. You can create, modify or delete the bar codes here.

- Asterisk key

1. Enter bar code Nbr.

2. Asterisk key
Type: Selection between EAN8 and EAN13

</tbody>
</table>

Remarks:

Each identification is only permissible as a coherent block. This block may only exist once.

Exception: Digits may be placed everywhere, as well as several blocks.

EAN-13: Check sum has to be at position 13, additionally also possible at position 7 or 8.
EAN-8: Check sum has to be at position 8 (and only there)
PLU is our internal PLU Number, article is SAN (Standard Article Number, partially worldwide unique)
Amount and weight are always printed without a comma, the amount with decimal digits, and the weight in grams.
Q is printed in the same format as delivered by the cell. R,S,T are re-formatted to fix decimal digits.
Identification T may have variable meanings.

148 METTLER TOLEDO Operating Instructions ME-Nbr. 2201 2539 Version 1.1.2 03/06
Modules for which a release is required

Release is conducted by METTLER TOLEDO.

1. Receipt forwarding

Balanced customer receipts are made available for the cash register and for customer specific evaluations.

2. Proof of origin

For labelling of beef, minced meat, fish, etc. to proof the traceability of origin.
Revision of beef labelling regulation

From September 1st, 2000, the compulsory beef labelling came into force in all countries of the European Union. According to the regulation (EG) Nbr. 1760/2000, which replaces the regulation (EG) Nbr. 820/97, information about the location of birth, fattening and slaughtering of the animal or group of animals from which the meat was derived must be shown on the label in addition to the reference number of the beef, which serves for the traceability of the meat. Furthermore, the place of cutting of the meat as well as the approval number of the slaughtering and cutting plant resp. cutting plants has to be indicated. This information is described as „compulsory information“.

Compulsory information for beef labelling (beef from the EU)

Reference number/code:
The number guarantees the traceability of the meat. This number may be the identification number of the animal from which the meat was derived or the identification number of a group of animals (lot). In no case, the size of the lot may exceed the daily production of a plant and the lot has to be slaughterhouse clean which means only animals from one slaughterhouse may be grouped in a lot.

Born in:
Identification of EU member state or third country. The use of country codes is not permitted!

Fattened in:
Identification of EU member state or third country. The use of country codes is not permitted!

Slaughtered in:
Identification of EU member state or third country. The use of country codes is not permitted!

European slaughterhouse number (ES-Nr.):
In case the slaughterhouse has no European approval number, the national registration number has to be mentioned. Is this number not available either, name and address of the slaughtering plant have to be mentioned. The lots have to be slaughterhouse clean, which means only the number or address of one slaughtering plant may be mentioned.

Cut in:
Identification of EU member state or third country in which the animal has been cut. The use of country codes is not permitted!

European cutting plant number (EZ-Nr.):
In case the cutting plant has no European approval number, the national registration number has to be mentioned. Is this number not available either, name and address of the cutting plant have to be mentioned. Opposed to the slaughtering level, the indication of multiple numbers is possible as far as the beef is traceable to the delivery of a single slaughterhouse.
Legend Date format

Date resp. time format to be printed is mentioned as a character chain.
