Precautions

READ this manual BEFORE operating or servicing this equipment.

WARNING

ONLY PERMIT QUALIFIED PERSONNEL TO SERVICE THIS EQUIPMENT. EXERCISE CARE WHEN MAKING CHECKS, TESTS AND ADJUSTMENTS THAT MUST BE MADE WITH POWER ON. FAILING TO OBSERVE THESE PRECAUTIONS CAN RESULT IN BODILY HARM.

WARNING

FOR CONTINUED PROTECTION AGAINST SHOCK HAZARD CONNECT TO PROPERLY GROUNDED OUTLET ONLY. DO NOT REMOVE THE GROUND PRONG.

WARNING

DISCONNECT ALL POWER TO THIS UNIT BEFORE REMOVING THE FUSE OR SERVICING. FAILURE TO DO SO MAY RESULT IN BODILY INJURY OR PROPERTY DAMAGE.

CAUTION

BEFORE CONNECTING/DISCONNECTING ANY INTERNAL ELECTRONIC COMPONENTS OR INTERCONNECTING WIRING BETWEEN ELECTRONIC EQUIPMENT ALWAYS REMOVE POWER AND WAIT AT LEAST THIRTY (30) SECONDS BEFORE ANY CONNECTIONS OR DIS-CONNECTIONS ARE MADE. FAILURE TO OBSERVE THESE PRECAUTIONS COULD RESULT IN DAMAGE TO OR DESTRUCTION OF THE EQUIPMENT OR BODILY HARM.

CAUTION

OBSERVE PRECAUTIONS FOR HANDLING ELECTROSTATIC SENSITIVE DEVICES.

CALL METTLER TOLEDO for parts, information, and service.

**Introduction**

Please read this instruction manual carefully. This manual is intended for use with all Diva Weigh Only and Price Computing scales.

The Diva scale is combined with a scanner for full featured Checkout applications. The Diva scale is a high precision weighing instrument. It is designed for applications where product is sold directly to customers and has to be approved by local Weights and Measures officials.

All of our equipment is assembled, tested and packed with great care. If you find something that does not meet your expectations, please contact us immediately.

This scale will provide years of accurate weighing if properly used and maintained. Please handle it as you would any piece of sensitive electronic equipment.

**GEO-Value**

The GEO-Value of verified scales explains for which location of use the scale has been verified. This GEO-Value is shown on the weight display shortly after power is applied to the scale.

1) Applies only to certified non-automatic weighing instruments. POS systems which are covered by a test certificate and which have undergone EC conformity assessment are included.

Gilt nur für geeichte nicht selbsttätige Waagen. Angeschlossene Kassensysteme, die ein Prüfschein / Testzertifikat vorliegen und die einem Konformitäts/Bestätigungsverfahren unterzogen wurden, sind eingeschlossen.

S'applique uniquement aux instruments de pesage à fonctionnement non automatique vérifiés. Les Terminaux Point de Vente qui sont couverts par un certificat d'essai et qui ont reçu l'évaluation de conformité sont inclus.

Applicable solamente a strumenti di pesatura a funzionamento non automatico verificati. Sono inclusi i sistemi POS coperti da un test certificate e sottoposti a valutazione di conformità CE.

Enkel van toepassing op gecertificeerde Niet Automatische Weegwerktoegen. Ook geldig voor aangesloten kassasystemen met een geldig testcertificaat en een EC-conformiteitsonderzoek, dat succesvol is afgerond.

Applicable solamente a instrumentos de pesaje a funcionamiento no automatico aprobados y verificados. Include sistemas POS que disponen de Certificados de ensayo de elementos y que han pasado una evaluación de Conformidad CE.

Important notice concerning verified instruments see overleaf!
Important notice for verified weighing instruments in EC-countries

Weighing instruments verified at the place of manufacture bear the preceding mark on the packing label and a green "M" sticker on the descriptive plate. They may be put into use immediately.

Weighing instruments which are verified in two steps have no green "M" on the descriptive plate and bear the preceding identification mark on the packing label. The second step of the verification must be carried out by the approved Mettler-Toledo service or by the W&M authorities. Please contact your Mettler-Toledo organization.

The first step of the verification has been carried out at the manufacturing plant. It comprises of all tests according to EN 45501-8.2.1. If national regulations in individual countries limit the period of validity of the certificate, then the users of such a weighing instrument are themselves responsible for its timely re-certification.

Wichtiger Vermerk für geeichte Waagen in EU-Ländern

Werksgiegte Waagen tragen vorstehendes Kennzeichen auf dem Packstück und einen grünen "M"-Kleber auf dem Eichschild. Sie dürfen sofort in Betrieb genommen werden.

Der erste Schritt der Eichung wurde im Herstellerwerk durchgeführt. Er umfasst alle Prüfungen gemäß EN 45501-8.2.2. Sofern gemäß den nationalen Vorschriften in den einzelnen Staaten die Gültigkeitsdauer der Eichung beschränkt ist, ist der Betreiber einer solchen Waage für die rechtzeitige Nachrechnung selbst verantwortlich.

Remarque importante pour les Instruments de pesage vérifiées dans les pays membre de l'Union Européenne

Les instruments de pesage vérifiés en deux étapes portent l'identification ci-contre sur leur emballage et n'ont pas d'autocollant "M" vert sur la plaque d'identification. La seconde étape de la vérification doit être effectuée par la service technique Mettler-Toledo autorisé responsables. Veuillez s.v.p. contacter le service technique Mettler-Toledo.

La première étape de la vérification a été effectuée en usine. Cela comprend tous les essais suivant la norme EN 45501-8.2.2. Dans la mesure où la durée de la vérification est limitée en fonction des prescriptions nationales dans les différents pays, l'utilisateur d'une telle balance est lui-même responsable de la vérification ultérieure dans les délais.

Nota importante para básculas verificadas en países de la UE

Las básculas verificadas en origen, llevan esta indicación en la etiqueta del embalaje y disponen de la etiqueta "M" sobre fondo verde en la placa de características. Pueden ser utilizadas inmediatamente.

Las básculas cuya verificación se realiza en dos fases, llevan esta indicación en la etiqueta del embalaje y NO llevan con la etiqueta "M" verde en la placa de características. La segunda fase de la verificación debe ser realizada por personal Mettler-Toledo acreditado, o por la autoridad competente. Rogamos contacten con el Servicio Técnico de Mettler-Toledo.

La primera fase de la verificación ha sido realizada en origen. Incluye todos los ensayos según la norma EN 45501-8.2.2. El plazo de validez de la verificación está limitado por las normas de cada estado. El usuario es responsable de la solicitud para las verificaciones reglementarias posteriores a la puesta en servicio de la báscula.

Nota importante per la balance approvate nei paesi UE

Le balance verificate in fabbrica portano questo contrassegno sull'etichetta dell'imballo e con il sigillo "M" su stande verde sulla targhetta metrologica possono essere messe in uso immediatamente.

Le balance che vengono verificate in due fasi, portano questo contrassegno sull'etichetta dell'imballo e NON portano il sigillo "M" sulla targhetta metrologica. La seconda fase della verifica deve essere eseguita dal servizio assistenza Mettler-Toledo autorizzato, oppure dalla autorità competente. Prego contattare il vostro servizio assistenza Mettler-Toledo.

La prima fase della verifica è stata eseguita dal produttore e comprende tutte le prove previste dalla norma EN 45501-8.2.2. Se la durata di validità della verifica è limitata in accordo con le prescrizioni nazionali vigenti nei singoli paesi, l'utilizzatore stesso di una bilancia di tale tipo sarà responsabile dell'esecuzione, entro la data di scadenza prevista, delle verifiche periodiche.
Dimensions

High tower version for Price Computing

Short tower version for Weigh Only
Installation

Environment
Before you install your DIVA scale keep in mind the following factors, which might have a negative influence on the scale’s operation:

- Vibration diminishes the scale’s ability to measure accurately. Excessive vibration from equipment such as conveyors can cause inaccurate and non-repeatable readings.
- Be sure the scale is leveled properly.
- Air currents can also diminish the scale’s performance. Avoid placing the scale in front of or directly under air vents.
- Other than items being weighed, keep the scale free from objects rubbing or pressing against the platter.

Contents of Packaging
Package contents for all DIVA units include:

- DIVA scale base
- Operation Manual
- Display Cable
- Tower included and attachment hardware (The optional display may be packed separately)
- Communication and Display cables (from scale to scanner)
- Sealing Kit

Setup
1. Open the box, carefully remove the packing material, take all items out of the carton.
2. Attach the display as described below, depending on which version of scale you ordered:

For Price Computing Version:

A: Pull the connector of the cable through the holes of the table surface and tower mounting bracket;
B: Put (2) screws through the (2) arch holes on the bracket and (2) holes on the table surface;
C: Attach cover to the surface of table with (2) nuts.
D: Connect the cable to the connector at the bottom of the tower display
E: Attach the base of the display to the mounting bracket by insuring that the (2) pins on the bracket are inserted in the holes of the base to attach the tower and snap the tower into place.
For Weigh Only Version:
The Weigh Only version comes with a tower mount.

Assemble the Weight Only tower as is illustrated here:

2. Set the scale base on a sturdy, level surface. Level the scale by turning the adjustable feet on the bottom of the unit. Adjust the feet until the level bubble is in the center of the circle.
   Bubble indicator:
   Correct    Wrong

3. Put the platter on top of the DIVA scale base.
4. Connect the tower display cable to the scanner.
5. Attach the communications cables between the scanner and the POS.

Power up sequence

Note: Before powering on the DIVA scale, always make sure there is nothing on the platter.
Apply power to the scanner. The scale will go through a series of self-tests and then will proceed to normal operating mode. The power-up sequence is as follows:
1. All segments of the display characters are lit. This verifies operation of all segments;
2. The scale displays the country code and GEO code, software part number and revision.
3. The scale then captures zero and is ready for normal operation.
Display and Keyboard

Display

Price Computing Version:
Weight Only Version:

Keyboard

- Used to return the scale to gross zero if drifting should occur.
- Tare key.

![Diagram of Cursors](image-url)
Operations

Weighing and Communication

Place the item to be weighed on the platter, the weight will be displayed. Remote ASCII commands can control all other functions including data transfer, zero, and tare, depending on the protocol.

Backlight function

Diva is equipped with a backlight for the display. To switch on the backlight, press and hold the "ZERO" key for about 3 seconds until the backlight turns on. Use the same procedure to switch the backlight off.

Re-zero function

There are two ways to re-zero the scale:
1. Power-up Zero
2. Push button Zero

Power-up Zero
The scale will automatically capture zero when it is turned on. The power-up zero capture range is +/-10% of the scale capacity. When the scale is turned on with a weight on the platter of more than +/-10% of the capacity, the scale will not capture zero (the weight display will show "-----") and the scale will not be ready for use. After removing the weight the scale will capture "zero".

Push button Zero
The ZERO key re-zeros the scale over a range of +/-2% of the scale capacity. To use this function, the scale must be in the gross weighing mode (NET cursor must be off) and in a non-motion condition. When the weight on the platter is more than +/-2% of the scale capacity, the depression of the zero key will not be accepted.

Tare Function

The Tare Key allows you to subtract weight from the platter for items like containers that will be used to hold the item being weighed.

Place the empty container or wrapping material on the platter and Press the Tare Key.

Place the item to be weighed in the container or on the wrapping material and onto the platter.

Note: A Tare command can be sent from a POS through the Diva’s serial connection. Whatever method is used to start a transaction must continue to be used until the transaction is over. If the push button is used first, a remote tare command will not work. Conversely, if a remote tare is used then the push button will not work until the transaction is complete and the scale has returned to zero.
Setup

This mode allows an operator to change certain soft switches directly from the keyboard.

Press and hold the key until “grP 1” and “CONF” is displayed. This will take about 8 seconds. The scale is configurable for your specific needs with a special interactive set up procedure. In order to access the various prompts, you must utilize the following keys during the scale setup mode.

- This key is used to confirm the choice and then go to the next step.
- This key is used to step through the set up groups. Once a group is accepted, this key is used to select the soft switch settings.
