DataBridge™
Vehicle Scale Software
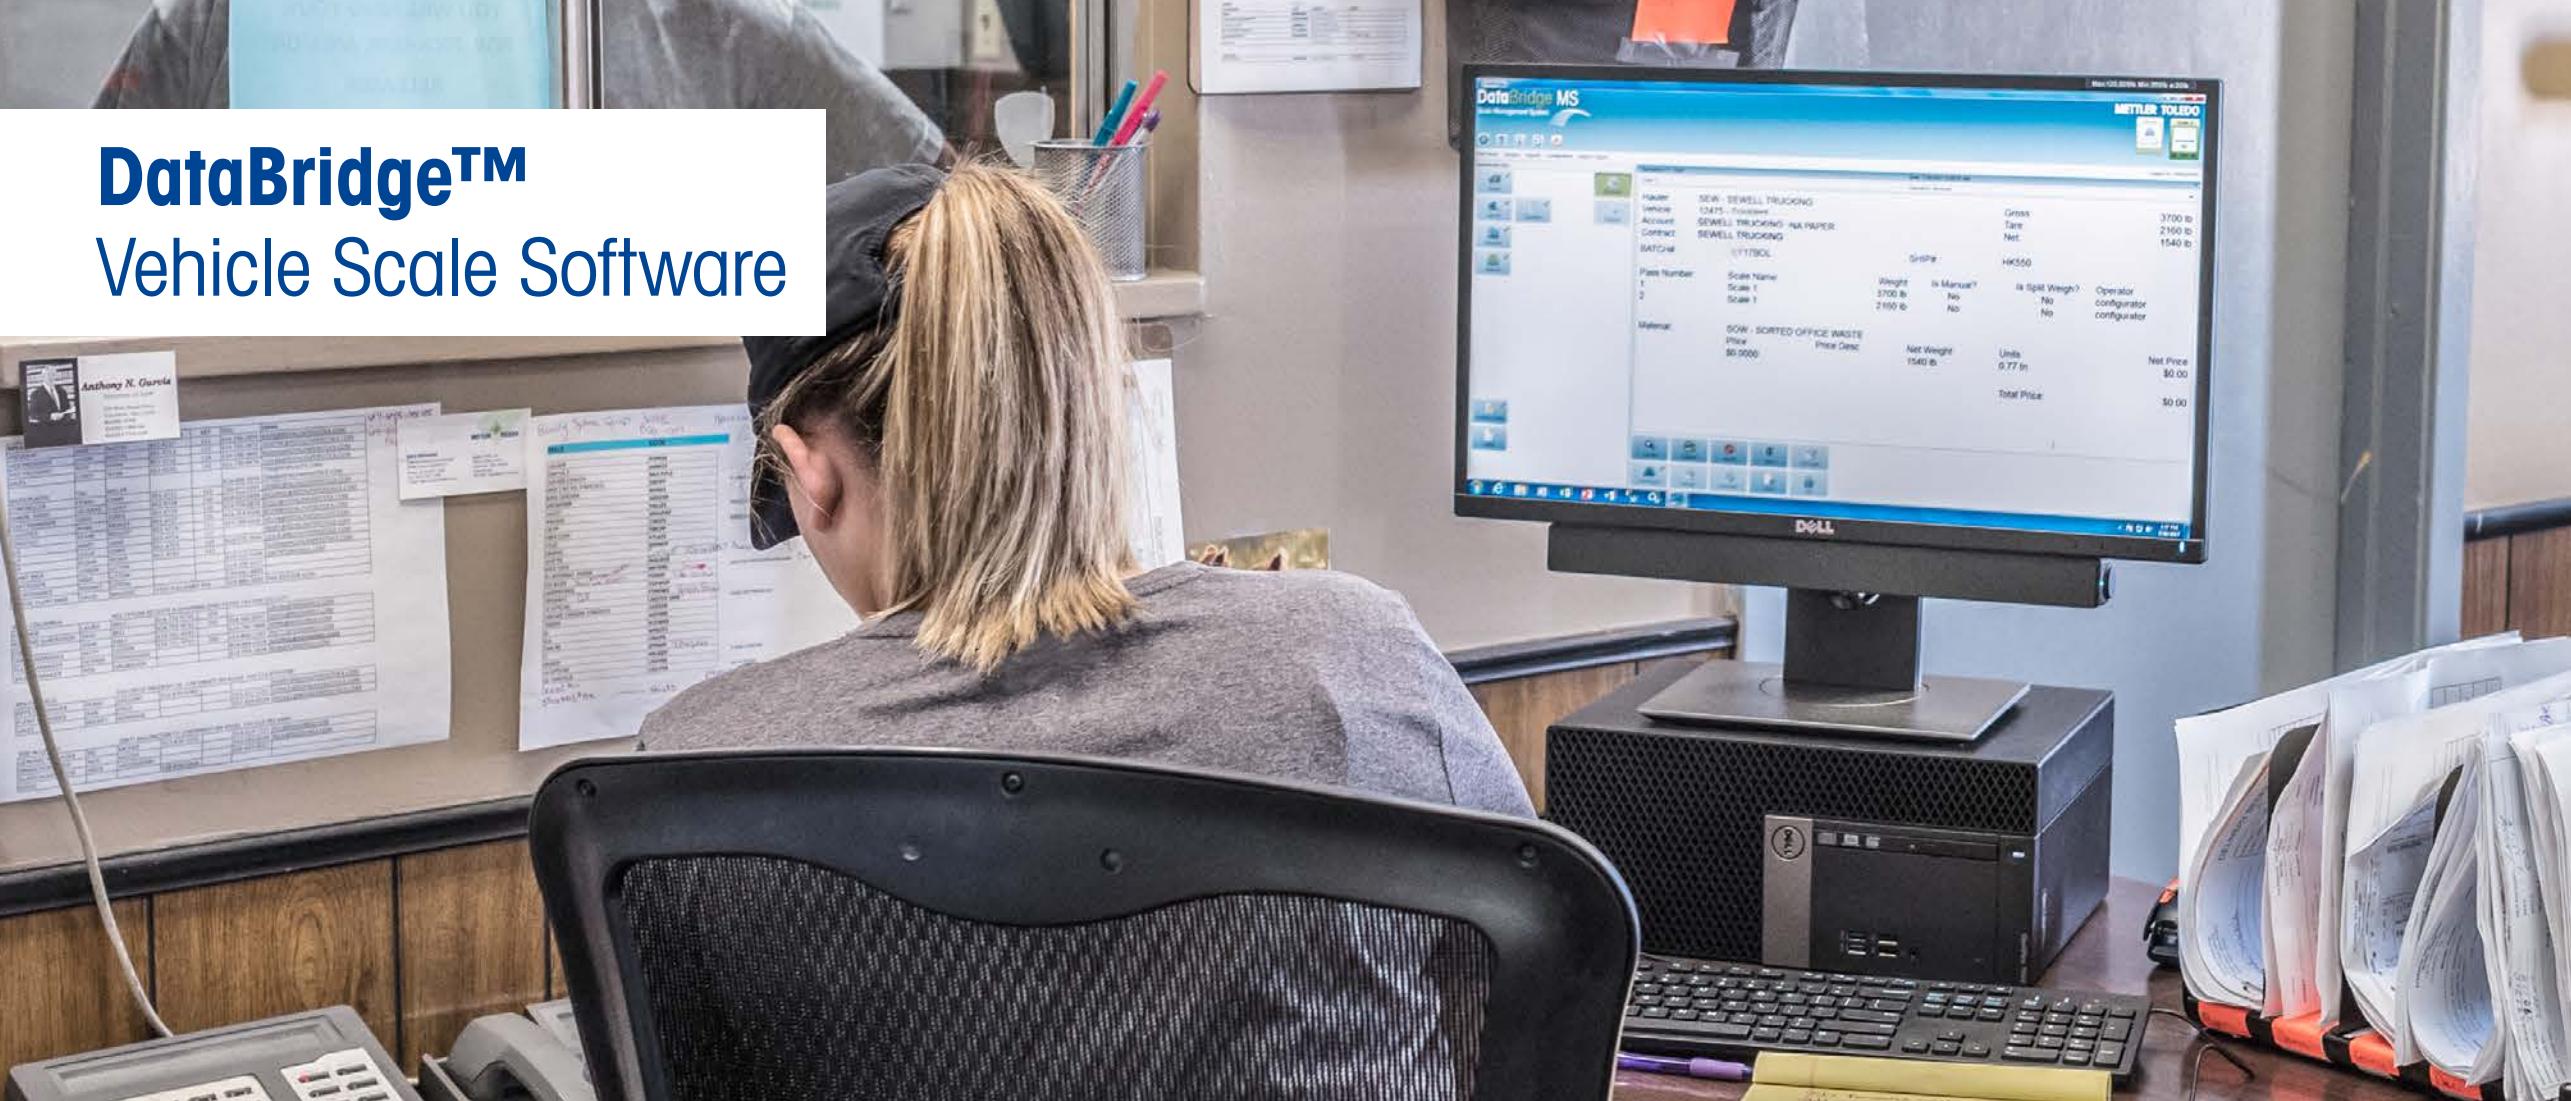

METTLER TOLEDO

Benefits of DataBridge™
Fast and Accurate Transactions

DataBridge gives you control over your vehicle weighing process with effortless connection to real-time data.

Faster Transactions
Speed up transactions by 50% when compared to traditional ticketing systems.

Fewer Errors
DataBridge pulls weight data directly from the scale, eliminating costly human errors and automating your process.

Improved Operational Visibility
Compile fully formatted reports in seconds, eliminating paperwork and saving time.

Fraud Prevention
Weight-curve functionality detects manipulation and stores tare weights to stop cheaters who carry extra weight.

Global Support
Global resources and technical expertise provide ongoing software support for all installations, from the scalehouse to the corporate office.

Scalable Software
- DataBridge SS is ideal for operations with 1–2 truck scales.
- DataBridge MS is suited for sites with multiple scales.
- DataBridge ES is our enterprise solution.

Benefits of DataBridge™
Simplified Data Management

PC-Based On-Prem Software Package
DataBridge is designed to run on your hardware and behind your firewall for peace of mind and simplified compliance with IT requirements.

Technology Stack
Built on a solid foundation of current technologies and tools in the Microsoft stack, such as C#, .NET, SQL, WPF and more, DataBridge promotes a rapid and rich development environment.

Robust Quality Assurance Testing
DataBridge has been subjected to over 5,000 tests including functional, integration, unit, UI, and manual testing. Proven performance and quality assurance help to ensure each release is stable and ready for a live environment.

Agile Development + SCRUM
Adhering to a behavior-driven development framework, the DataBridge team works directly with end-users to ensure good communication, transparency, and flexibility.

Data Map
Export transactions via csv, XML, or direct to database.

Plug-Ins
Leverage event hooks within the application to trigger actions.

RESTful API
Web services facilitate data exchange with web applications.

Weighbridge Service Solutions
Tailored to Fit Your Needs

METTLER TOLEDO Service delivers resources to enhance your efficiency, performance, and productivity. Explore our service offerings below or reach out to your local METTLER TOLEDO representative to find the best fit for you.

Warranty Coverage

All warranties are not created equal. Coverage can vary greatly from one supplier to the next. It is critical to ask about parts, labor, travel, calibration, environmental protection, stipulations, and more when exploring various warranty offerings.

Performance Upgrades

Load cells, indicators, peripherals, and software upgrades enhance the accuracy, reliability, and functionality of your truck scale beyond its current capabilities. With POWERCELL® upgrade and conversion kits, you can protect profitability and extend the life of your asset, all at a fraction of the cost of a new scale.

Professional Installation

Establish full confidence in your equipment from day one. Our expert technicians execute installation and testing, full system setup and calibration, setup of standard operating parameters, and user and maintenance familiarization. Simplify compliance with site, regulatory, and quality requirements.

Asset Maintenance

Regular maintenance enables reliable performance, compliance, and budget control. With insight into asset performance, you can minimize unplanned downtime and maintenance costs. Extend asset life with calibration, powerwashing, replacement of worn parts, and lubricating of the load cells and receivers.

Care Packages

Care Packages keep your operation running like clockwork. Crafted to cater to your specific needs, our packages provide preventive maintenance, replacement parts, and flexible support options.
