Flexibility. Viper Smart Count offers features for customer flexibility including programmable soft keys, one-touch sampling/hands-free counting, barcode input and output, 3 data interfaces, standard PS2 keyboard connectable, and discrete inputs and outputs.

Database. Internal database allows up to 1500 data records (more memory available) including article names, APW, filling targets, tolerances, Tare weights, inventory data, and much more.

MonoBloc Inside. Heavy duty aluminum alloys, as used in the aircraft industry, assure high accuracy of measurement results for years to come. Because of the high resolution, even for high capacities, with a Viper MonoBloc scale you have no need for a two scale system.
