RL00-F610 Black Eagle Prepack Printer Terminal

METTLER TOLEDO

Your Best solution to all Prepacking needs

Black Eagle Printer Terminal is specially developed to meet the increasing printing needs of food retailers, including supermarkets, bakeries and food packing or distribution facilities. Its connectivity option to various weighing platforms expands its functionality to the receiving area of supermarkets as well as other weighing applications.

Extra text memories accommodate ingredients listings, cooking instructions and other important printout needs. At the same time, graphical printouts are also supported.

Its stainless steel printer structure provides reliable and long lasting performance. High capacity storage memory allows retailers to continuously increase their product offerings with no hardware limitations. Coupled with Hi-Speed Ethernet connectivity, you are guaranteed a faster and more convenient scale data management experience!

Features	Benefits
Fully Stainless steel printer	For more reliability and durability
Multi language operator display	For easy operation and user training
Unique printer release mechanism	For easy label loading and thermal
154 Preset Keys	Fast retrieval of "HOT" items.
Extra text printouts	Clear printout of ingredient list and other promotional messages.
Various sales reports available	Better management of productivity and sales analysis
High PLU storage capacity	Allows for expansion of item
High Speed Ethernet connectivity	For easy and fast updating of pricing data to ensure accurate sales data.
Flash memory	Upgrading of software functionality and OS with ease.
Open Database structure	Flexible structure and customer database connectivity.

Product Technical Specifications

Capacity	3kg~1,000kg(With various platform options)
Dimensions	275mm(L) x 306mm(W) x286mm(H)
Weight	7.1 kg
Power/Voltage	100~240VAC@50/60 Hz, 30W
Operating Temperature	-10°C~+40°C
Humidity	<95%RH, Non condensing
Print Speed	100 mm/Sec
Label width	30~62mm
Label Length	25~120mm
Memory Capacity	10,000 PLUs standard, expandable to over 200,000 PLUs
Barcode formats	EAN13, ITF25, EAN128, UPC-A, EAN8, CODE39
Connectivity	Ethernet RJ45, RS232, Cash drawer, Wireless (RF) Optional
Printout Capability	Item name, Article no, Weight, Tare, serial number, Unit Price, Total Pricing, Barcode, Dates, Time, Shop name, Discounts , Advertising test, Special text, Graphical shapes, etc.
