World leaders in metal detection
providing peace of mind in an uncertain world

No room for complacency
Effective metal detection systems are a necessity for every food and pharma-
ticeutical manufacturer safeguarding consumers, protecting manufacturer brands
and assisting in conformance to regulatory
requirements. Nobody understands these requirements better than
Mettler-Toledo Safeline.

Comprehensively superior solutions
The most effective metal detection solutions combine a low power, high
frequency magnetic coil with advanced digital signal processing - the coil
senses the disturbance caused by metal contaminants and this signal is
interpreted by digital electronics. Mettler-Toledo Safeline is the only company to
place equal emphasis on improving the electronics and the magnetic sensing
to provide the ultimate in metal detection capability.

The obvious choice
Mettler-Toledo Safeline end-of-line and in-process solutions are uniquely
efficient, encompassing robust construction standards to deliver outstanding
reliability and performance in even the harshest environments. Ease of
operation is second to none - this maximises operator effectiveness and
processing/packing line efficiency to provide true peace of mind.

In a complex and uncertain world, where the welfare of consumers and the
reputation of brands are paramount, there’s a refreshingly simple
choice - Mettler-Toledo Safeline.

Envisioned wealth and capability
As one of the Mettler Toledo group, a global corporation with sales in
excess of $1 billion a year providing the world’s most comprehensive
range of precision weighing, packaging, product inspection, robotics
industrial and service for industrial use, in part of the ‘Product
Inspection Division’, which encompasses checkweighing and X-Ray
inspection systems, we belong to a unique well resourced inspection
solutions entity offering true global coverage and an unmatched record of
technical innovation.

Unrivalled reach and capability
We are part of the Mettler Toledo group, a global corporation with sales in
excess of $1 billion a year providing the world’s most comprehensive
range of precision weighing, packaging, product inspection, robotics
industrial and service for industrial use, in part of the ‘Product
Inspection Division’, which encompasses checkweighing and X-Ray
inspection systems, we belong to a unique well resourced inspection
solutions entity offering true global coverage and an unmatched record of

In a complex and uncertain world, where the welfare of consumers and the reputation of brands are paramount, there’s a refreshingly simple choice - Mettler-Toledo Safeline.

Unrivalled reach and capability

We are part of the Mettler Toledo group, a global corporation with sales in excess of $1 billion a year providing the world’s most comprehensive range of precision weighing, packaging, product inspection, laboratory instruments and services for industrial use. As part of the ‘Product Inspection Division’, which encompassed metal detecting and X-Ray inspection systems, we belong to a unique well resourced inspection solutions entity offering true global coverage and an unmatched record of technical innovation.

formed in 1989, Safeline has grown from a small privately owned UK based business to become the world’s largest brand in industrial metal detection. Today, we hold about 30% of the global metal detection market and sell 65% more heads than our closest competitor. We have more than 500 staff, based at our UK headquarters and at subsidiaries in mainland Europe and the US, plus an extensive network of partner companies worldwide.

World leaders in metal detection providing peace of mind in an uncertain world

No room for complacency

Effective metal detection systems are a necessity for every food and pharmaceutical manufacturer. By safeguarding consumers, protecting manufacturer brands and ensuring conformance to regulatory requirements, nobody understands these requirements better than Mettler-Toledo Safeline.

Comprehensively superior solutions

The most effective metal detection systems combine a low power, high frequency magnetic coil with advanced digital signal processing. The metal detection system senses the disturbance caused by metal contaminants and this signal is interpreted by digital electronics. Mettler-Toledo Safeline is the only company to place equal emphasis on improving the electronics and the magnetic sensing to provide the ultimate in metal detection capability.

The obvious choice

Mettler-Toledo Safeline end-of-line and in-process solutions are uniquely efficient, encompassing robust construction standards to deliver outstanding reliability and performance in even the harshest environments. Ease of operation is second to none, this maximising operator effectiveness and processing/packing line efficiency to provide true peace of mind.

In a complex and uncertain world, where the welfare of consumers and the reputation of brands are paramount, there’s a refreshingly simple choice - Mettler-Toledo Safeline.

Unrivalled reach and capability

We are part of the Mettler Toledo group, a global corporation with sales in excess of $1 billion a year providing the world’s most comprehensive range of precision weighing, packaging, product inspection, laboratory instrumentation and service for industrial use, as part of the ‘Product Inspection Division’, which encompasses metal detection and X-Ray inspection systems. Mettler Toledo Safeline, formed in 1989, is the world’s largest and most successful metal detection company, offering true global coverage and an unrivalled record of technical innovation.

World leaders in metal detection
Breadth of experience, depth of capability

Our extensive range of Fully Enclosed and Enclosed designs are used to meet legislation and industry standards. They can be used in restricted areas where space is limited.

- **Concrete wall metal detectors** are designed for wall and ceiling applications and can be used in both new constructions and existing environments.
- **Pipe metal detectors** are available in both wall and ceiling versions and are designed to be installed in existing systems or new installations.
- **Wall-mounted metal detectors** are designed for ceiling applications and can be used in both new constructions and existing environments.
- **Semi-enclosed metal detectors** are designed for wall and ceiling applications and can be used in both new constructions and existing environments.
- **Enclosed metal detectors** are designed for wall and ceiling applications and can be used in both new constructions and existing environments.

**Technical Specifications**

- **Material:** Stainless steel
- **Power:** 220V
- **Dimensions:** Various options available
- **Weight:** Various options available

**Applications**

These detectors are suitable for a wide range of applications, including:

- **Food industry**
- **Pharmaceutical industry**
- **Chemical industry**
- **Construction industry**

**Features**

- **High sensitivity**
- **Durable construction**
- **Easy maintenance**

**Benefits**

- **Reduced downtime**
- **Increased productivity**
- **Improved safety**

**Contact Us**

For more information or to discuss your specific requirements, please contact us at: info@mettler-toloidal.com or call us on: +1-800-123-4567.
The widest range for the most diverse and demanding applications from processed foods and packaged products to liquids, our experience satisfies increasingly demanding customers.

Whatever the challenges, our solutions combine cutting edge technology, conforming with ever stringent legislation, or demanding environments, or unusual applications. Enhancing quality and diligence, our solutions satisfy customers across a wide variety of industry sectors.

Product quality and always consistent each solution is customized to the manufacturer’s unique and evolving requirements.

Integrating process, robotic packaging systems, harsh environment, or unusual applications. Enhancing quality and performance, our solutions are designed for effective, efficient, and reliable performance. Conformance with stringent legislation, or challenging environments, or unusual applications. Enhancing quality, diligence, and evolving requirements.

Our resources are among the best in the world. You can rely on us now, and in the future.

Total Quality is not just a catchphrase at Mettler-Toledo Safeline – it’s a core principle that runs all the way through everything we do, from supplier and customer relationships to manufacturing, design and testing practices.

A commitment to continual improvement is central to all that we do at the Mettler-Toledo Safeline UK. We are committed to continual improvement to provide consistently high performance, even in the harshest environments, even in the harshest environments, even in the harshest environments. We are committed to continual improvement to provide consistently high performance, even in the harshest environments, even in the harshest environments, even in the harshest environments.

Product quality and always consistent each solution is customized to the manufacturer’s unique and evolving requirements.
The widest range for the most diverse and demanding applications from processed foods and packaged products to liquids, slurries and pharmaceuticals. Mettler-Toledo Safeline has the highest sensitivity and trouble-free performance. Our mechanical design and advanced digital electronics to provide satisfying increasingly demanding customers. Diligence’, conforming with ever stringent legislation, or control, minimising breakdowns, demonstrating ‘due environments, or unusual applications. Enhancing quality and widely differing requirements.

Part of our success rests on our ability to build extremely close partnerships with all of our customers to gain in-depth knowledge and expertise across a wide variety of industry sectors. Product quality is always considered each solution is customerized to the manufacturer's unique and varying effiency requirements. 

Our resources are among the best in the world. Total Quality is not just a catch-phrase at Mettler-Toledo Safeline - it’s a key principle that runs all the way through everything we do, from supplier and customer relationships to manufacturing, design and testing practices.

Mettler-Toledo Safeline detectors are built on proven, state-of-the-art technology. They are not only focussed on delivering solutions which excel today, but are working closely with our customers to identify tomorrow’s challenges and opportunities in the field of inspection and rejection of contaminants.

An eye to the future

The success of Mettler-Toledo Safeline is based on market-leading innovation to meet customer needs. We have number number to expert staff based at our UK headquarters and operate a team of experts who are passionate about product development. They are not only focussed on delivering solutions which excel today, but are working closely with our customers to identify tomorrow’s challenges and opportunities in the field of inspection and rejection of contaminants.

Mettler-Toledo Safeline is ISO9001 accredited and our machines are built to provide consistently high performance, even in the harshest environments. This is achieved through Mettler-Toledo Safeline's expertise in detection head design and manufacture at UK base. This facility also integrates heads into systems including reject devices and conveyors.

Localised support is provided globally through a network of strategically located specialist system designers and manufacturers across Europe, the US and the Asia-Pacific regions. These units give expert local support tailoring solutions to individual country's needs. We have number number to expert staff based at our UK headquarters and operate a team of experts who are passionate about product development. They are not only focussed on delivering solutions which excel today, but are working closely with our customers to identify tomorrow’s challenges and opportunities in the field of inspection and rejection of contaminants.

Our experience, depth of capability
Phil is our success rests on a broad canvas: extensive company relationships and a diverse range of industries. Together, they are ready to offer the most diverse and demanding applications.

Whatever the challenges, our solutions combine cutting edge technology with our extensive experience to satisfy increasingly demanding customers. Our solutions are designed to conform with ever stringent legislation, or to deliver enhanced performance for all process and packaging applications.

Our resources are among the best in the world. Our service help desk team are on hand to give technical advice and support to meet your exact needs. To ensure high performance, our metal detector systems are designed and manufactured in state of the art facilities in the UK headquarters and in the Asia-Pacific regions. These units give expert local support tailoring solutions to individual customer requirements.

Our measures are among the best in the world. Total Quality is not just a catchphrase at Mettler-Toledo Safeline - it’s a key strategy for all the way through everyday work we do. Our materials and machines are built to provide consistently high performance, even the most demanding applications. Our total after sales service programme gives you all the support you'll ever need. Then we provide top level after sales support through our locally based service engineers and technicians while our field based service team are ready to commission new solutions to ensure optimum performance and benefits are realised from day one.

World leaders in metal detection
providing peace of mind in an uncertain world

For over 20 years, Metal Detection has set the global standard for quality and service in the field of metal detection. Today, the company is the world leader in metal detection equipment, providing solutions to industries worldwide. Metal Detection’s comprehensive range of products includes magnetic separators, eddy current and X-ray systems, as well as turnkey plant solutions. The company offers a complete line of metal detection equipment, from small, portable units to large, complex systems. Metal Detection’s products are designed to meet the needs of a variety of industries, from food and beverage to electronics and pharmaceuticals. The company’s commitment to innovation and excellence has led to the development of many industry-leading technologies. Metal Detection’s expertise in metal detection technology, combined with a focus on customer service and support, makes it the ideal partner for businesses seeking to improve their metal detection capabilities. Whether you need small, portable units or complex, turnkey systems, Metal Detection has the solution for you. Learn more about Metal Detection’s comprehensive range of products and services at www.met-detection.com.
