

Omogućivanje nastavka poslovanja

Kada morate raditi na daljinu

ProdX je osmišljen za omogućivanje daljinskog nadzora i upravljanja resursima za kontrolu kvalitete proizvoda (PI) METTLER-TOLEDO gdje god se nalazili i kad god vam je to potrebno.

Kada instalirate softver i povežete svoje uređaje za kontrolu kvalitete na svojoj lokaciji, pristup podacima s daljinske lokacije jednostavan je poput pristupa vlastitom osobnom računalu u uredu na samoj lokaciji.

Predvjeti za daljinski pristup:

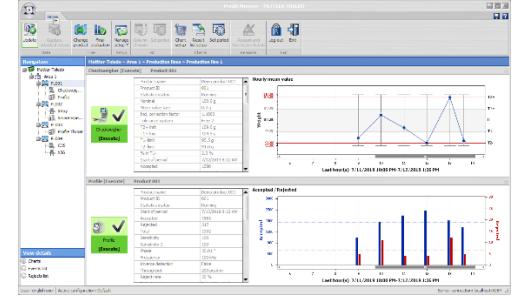

- Softver za nadzor i softver za upravljanje podacima ProdX instalirani na osobnom/prijenosnom računalu koje upotrebljavate na daljinu
- Pritstup internetu
- Sigurna VPN veza s mrežom vaše tvrtke

Nakon uspostavljanja sigurne veze možete:

1. Nadzirati proizvodne linije ili jedan uređaj za kontrolu kvalitete, događaje i odbačene proizvode.
2. Izraditi izvješća putem mrežnog preglednika i ispisati ih lokalno ili ih spremiti u obliku datoteka. Ako imate softver ProdX v2.3, ne morate se prijaviti u softver ProdX putem mreže vaše tvrtke. Možete postaviti da se automatizirana izvješća izravno šalju na vašu elektroničku adresu na kraju šarže ili smjene.
3. Osim toga, možete postaviti da vam upozorenja softvera ProdX šalju obavijesti u vaš poštanski sandučić ili na mobilni uređaj kako bi vas odmah upozorila ako postoji problem s kvalitetom ili proizvodnjom koji zahtijeva vašu neposrednu pažnju.

Postoje izazovi koje je potrebno svladati tijekom rada na daljinu, međutim, iako možda ne možete raditi kao obično, možete pratiti tijek događaja.

Za više informacija: obratite se svojem lokalnom predstavniku tvrtke METTLER-TOLEDO. Sve pojedinosti za kontakt možete pronaći na www.mt.com/contact
